FORM 7

MONTHLY PROGRESS REPORT

Name of Listed Issuer: Super Copper Corp. (the "**Issuer**").

Trading Symbol: CUPR

Number of Outstanding Listed Securities: 54,478,594 (as of May 30, 2026)

Date: June 4, 2026

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

(a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.

(b) The term "Issuer" includes the Issuer and any of its subsidiaries.

(c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

   Super Copper is a mining exploration company focused on the acquisition, exploration and development of copper and precious metal projects. It is currently developing its joint venture in a prospective Chilean copper property located within the copper-rich Venado Formation in the province of Atacama, Northern Chile, a region with world-class infrastructure and the presence of global majors.

2. Provide a general overview and discussion of the activities of management.

During the month of May 2026, management of the Issuer finalized drill targeting for the maiden diamond drill program at its Cordillera Cobre copper project, located in Chile's Atacama Region, and commenced an integrated geophysical and hyperspectral exploration program at its 100%-owned Castilla copper-gold project.

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

On May 5, 2026, the Issuer announced results from its 3D magnetic vector inversion ("**MVI**") of ground magnetic data at the Cordillera Cobre Project, near Copiapó, Chile.

Highlights include:

- 3.5-Kilometre Magnetic Corridor Defined Across El Alto and Calcite Hill: MVI modelling has identified a coherent magnetic corridor along a NW–SE structural trend across the El Alto and Calcite Hill target areas, the first geophysical evidence linking these two areas within a single coherent magnetic corridor.
- Two Independent Geophysical Surveys Point to Same Target: The strongest magnetic zones and the strongest chargeability zones overlap at depth, two independent methods detecting the same target. This overlap reduces the likelihood that either anomaly is caused by something other than mineralization.
- Historical Drilling Intersected Copper at the Margin of the Anomalies: Historical drill holes returned up to 14 m at 0.508% Cu, including 2 m at 1.605% Cu (DVP-01), from the outer margin of the combined geophysical anomalies. The highest-intensity magnetic and chargeability core at depth has not been tested by drilling to date.

On May 13, 2026, the Issuer announced that that it has finalized drill targeting for the maiden diamond drill program at its Cordillera Cobre copper project.

Highlights include:

- Eight drill pads designed to test priority targets at El Alto, with pad coordinates and elevations finalized for inclusion in permitting and contractor scopes.
- Pad array spans approximately 1.5 km east-west and 1.1 km north-south, with collar elevations ranging from approximately 1,400 m to 1,600 m above sea level, a footprint designed to test the IP chargeability anomaly defined in the Company's geophysical survey (see news release dated April 9, 2026) along strike and at depth.
- Targets selected through integration of surface geochemistry, ground magnetics, induced polarization (IP) chargeability, and 3D magnetic vector

inversion (MVI), providing convergent geophysical and geochemical support for each collar location.

- Drill collars positioned to test the 800m+ corridor of chargeability defined in the IP survey, which remains open at depth below the survey's ~400 m vertical resolution.
- Program scoped at approximately 5,000 metres across 8–10 holes, targeting commencement in Q2 2026, subject to receipt of the DIA environmental approval currently in preparation for filing with Chile's Servicio de Evaluación Ambiental (SEA).
- Contractor selection process advancing in parallel, with diamond drilling RFQs issued and evaluation underway.

On May 26, 2026, the Issuer announced that it has commenced an integrated geophysical and hyperspectral exploration program at its 100%-owned Castilla copper-gold project ("Castilla"), located approximately 60 km southwest of Copiapó in Chile's Atacama region. The program is designed to systematically convert Castilla's extensive surface mineralization, including results of up to 53.8 g/t Au and 17.7% Cu, into ranked, drill-ready targets across the property.

Program Highlights include:

- Drone-borne magnetic survey engaged to complete high-resolution total-field magnetics over the full property footprint, flown at 50 m above ground level using a Geometrics MagArrow cesium-vapour magnetometer on a DJI Matrice 300 RTK platform
- WorldView-3 satellite hyperspectral imagery engaged with PhotoSat Information Ltd. for high-resolution alteration mineral mapping over an 85 km² core area, complemented by a regional (R-HET) hyperspectral package covering 2,000 km²
- Induced Polarization (IP) survey to follow on highest-priority targets identified by magnetics and hyperspectral integration, designed to map disseminated sulphides and chargeable bodies at depth
- Integrated 3D inversion of magnetic and IP datasets planned to deliver a fully-modelled targeting package

Following completion and integration of the magnetic and hyperspectral datasets, the Issuer anticipates deploying a ground IP / resistivity survey across the highest-priority target areas. The WorldView-3 alteration mapping will be carried out over an 85 km² core area at the Castilla property.

Please refer to the Issuer's news releases dated May 5, May 13, and May 26, 2026 for additional details.

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.

Not applicable.

5. Describe any new business relationships entered into between the Issuer, the Issuer's affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship.

   On May 26, 2026, the Issuer announced that it has engaged a Santiago-based geophysical services contractor with ISO 9001, 14001 and OHSAS 18001 accreditation, to execute a property-wide drone-borne magnetic survey at Castilla. Field acquisition is expected to take approximately eight days, followed by processing and reporting.

   In addition, the Issuer has engaged PhotoSat Information Ltd. of Vancouver to deliver an integrated remote-sensing alteration mapping package including WorldView-3 high-resolution satellite imagery and hyperspectral dataset.

   Please refer to the Issuer's news release dated May 26, 2026 for additional information regarding the drone magnetic survey and WorldView-3 alteration mapping.

6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced.

   Not applicable.

7. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how the consideration was determined and whether the acquisition was from or the disposition was to a Related Person of the Issuer and provide details of the relationship.

   Not applicable.

8. Describe the acquisition of new customers or loss of customers.

   Not applicable.

9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trade-marks.

   Not applicable.

10. Report on any employee hirings, terminations or lay-offs with details of anticipated length of lay-offs.

    Not applicable.

11. Report on any labour disputes and resolutions of those disputes if applicable.

Not applicable.

12. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings.

Not applicable.

13. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness.

Not applicable.

14. Provide details of any securities issued and options or warrants granted.

Security	Number Issued	Details of Issuance	Use of Proceeds(1)
Stock Options	1,210,000	Stock Option Grant(2)	N/A

Notes:
(1) State aggregate proceeds and intended allocation of proceeds.
(2) Please refer to the Issuer's Form 11 Notice of Proposed Stock Option Grant or Amendment dated May 5, 2026.

15. Provide details of any loans to or by Related Persons.

Not applicable.

16. Provide details of any changes in directors, officers or committee members.

Not applicable.

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

Trends which are likely to impact the Issuer are detailed in the Issuer's Management Discussion and Analysis and CSE Form 2A Listing Statement dated October 3, 2024, available on the Issuer's SEDAR+ profile and CSE profile.

Certificate Of Compliance

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.

2. As of the date hereof there were is no material information concerning the Issuer which has not been publicly disclosed.

3. The undersigned hereby certifies to the Exchange that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all Exchange Requirements (as defined in CNSX Policy 1).

4. All of the information in this Form 7 Monthly Progress Report is true.

Dated June 4, 2026.
