*Pure Cannabis Cigarettes to be Introduced to Canadian Cannabis Market*

---

**THC.CSE**

**THCBF – OTC**

**TFHC.F**

**Vancouver, B.C. – (June 11, 2019** THC BioMed Intl Ltd. ("THC", or the "Company") (CSE: THC)

THC BioMed is pleased to announce that it is the first Canadian Licensed Producer to automate the pre-rolling of cigarettes containing 100% cannabis (the “Pure Cannabis Cigarettes”). In the same way automation changed the tobacco industry, THC BioMed is confident the automation of Pure Cannabis Cigarettes will bring meaningful changes to the current cannabis industry and its bottom line.

The automated cigarette manufacturing plant has been installed at THC BioMed’s flagship Acland Road location. THC will begin the production and sales of commercial-grade Pure Cannabis Cigarettes, a first in Canada.

The Pure Cannabis Cigarettes are to be packaged in lots of 3 and 20. Each Pure Cannabis Cigarette will be intended for a single-use session and will come with a commercial-grade cigarette filter. There will be no tobacco in the Pure Cannabis Cigarettes.

“We are very pleased to offer Canadians a better way of smoking cannabis, as we monitored an increase in demand for our best-selling pre-rolls, we acknowledged that it was our duty to ensure we distribute the best products possible. We are pleased to be the first cannabis producer to put filters between the cannabis we are selling, and our consumers. Filters were invented to protect the consumer and not degrade the experience. “We promise our Pure Cannabis Cigarettes will offer the same potency as our regular best-selling pre-rolls. I am predicting consumers will gravitate towards this finished type of product and the old way of rolling joints will be something of the past,” said John Miller, President and CEO of THC BioMed.

The automated cigarette manufacturing plant is capable of producing up to 5,000 cigarettes *per* minute.

“We also expect our CBD line of Pure Cannabis Cigarettes to be very popular, as we expect regular cigarette users will find it easier to transition to our CBD product, which we think is better than smoking tobacco,” said Mr. Miller, “Automating our systems now gives us a clear path to profitability. We work diligently to bring shareholder value through more traditional and tested ways such as being a profitable company, patience is required.”

THC plans to offer the following strains in Pure Cannabis Cigarette form, other strains may follow:

THC Sativa Landrace;  
THC Indica Landrace;  
THC Hybrid Landrace; and,  
CBD Landrace.

THC expects its Pure Cannabis Cigarettes to be available soon *via* its website for medical patients and through provinces with distribution agreements with THC.
