Date: July 3rd, 2018

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

Advantagewon is focused on building consistent cash flow from low cost, low risk oil wells in the State of Texas. AOC applies specialized expertise to increase oil recovery from 10-15% to up to 75% for each well. Once the enhanced recovery strategy is successfully applied, AOC will repeat the

process throughout the oil pool to maximize output and minimize cost and risk. For the month stated in this report, the Corporation continued its business development objectives of developing its current properties, seeking additional properties, increasing the Corporation's corporate brand awareness and corporate profile to the capital markets.

2. Provide a general overview and discussion of the activities of management.

Management continued its corporate and business development endeavours as stated in point #1 of this form. Furthermore, in the month stated in this report, the Corporation's Management Team completed the following transactions as stated and as outlined below:

June 1st, 2018 – Advantagewon Oil Corp., announced that the swabbing of the two wells previously drilled on one of its properties in the LaVernia area had been completed. The Corporation announced that it had encountered encouraging results from the first well drilled earlier this year. The primary sand target in the first well was perforated and swabbed. The initial fluid level in this first well was at 384 foot from surface, which is approximately 720 feet above the perforations showing considerable inflow into the well bore. The first swab on this well recovered 100 feet of oil. The second swab recovered 300 feet of oil and water. The Corporation believes minor formation damage occurred in this first well during drilling which may be partially restricting flow rates and the Corporation is now planning a small frac'ing procedure in an attempt to correct this and enable the well to demonstrate its ultimate flow potential. Drilling fluid chemistry was modified for the drilling of the second well to address the formation damage issue. The second well was perforated in the secondary deeper sand zone, and swabbed, and proved to be wet in this secondary target zone. A bridge plug was placed above this zone and the primary shallower sand zone which had recovered oil in the first well was perforated on May 30th, 2018. Swabbing equipment will be recalled as soon as possible to continue evaluation. There were oil shows from this sand in the second well as it was drilled. The Corporation is now in the process of sourcing tanks, pumps and a generator to be installed so it can commence further production testing and determine flow rates on the two wells.
