**17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.**

In March 2020, the World Health Organization declared a global pandemic related to the outbreak of the novel strain of coronavirus, specifically identified as "COVID-19". This has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures which include the implementation of travel bans, self-imposed quarantine periods and social distancing have caused material disruption to businesses resulting in a global economic disruption. Global equity markets have experienced historic volatility and weakness. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize domestic economic conditions. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of the government and central bank interventions.

The Issuer had operated primarily on a virtual basis prior to the COVID-19 pandemic. Therefore, the implementation of travel bans, self-imposed quarantine periods, social distancing and general closure of non-essential businesses in response to COVID-19 has not materially impacted the Issuer with its day-to-day operations. Furthermore, the Issuer does not expect the COVID-19 pandemic to have a material adverse effect on the Issuer's results of operations.
