NEWS RELEASE

HealthSpace Deploys COVID-19 Contact Tracing in Montgomery County Illinois

VANCOUVER, BC – May 6, 2020 - HealthSpace Data Systems Ltd. (the "Company" or "HealthSpace") (CSE:HS) (Frankfurt:38H) (OTC:HDSLF) is pleased to announce it has begun working with Montgomery County Health Department in Illinois to utilize the Company's HSCloud Suite platform for COVID-19 contact tracing. Montgomery County reached out to the Company last week as they heard about the benefits of the platform from Cass County, another agency in Illinois utilizing HealthSpace for contact tracing. The Company provided access to Montgomery County May 4th and is providing use of the platform on a gratis basis for the duration of the COVID-19 pandemic.

The Company has continued to see increased demand as word spreads about the platform. In recent weeks, both the US and Canadian governments have stressed the need for extended contact tracing. The Company is poised to continue to work with government agencies, both large and small, to act as a force multiplier to public health agencie's contact tracing efforts.

HealthSpace CEO, Silas Garrison commented "Contact tracing has dominated the headlines recently. This news flow and heightened awareness regarding the needs and benefits of contact tracing is extenuating the glaring gap in the ability for agencies to utilize technology to help. Our platform not only has the ability to be deployed rapidly, it fits perfectly within the normal course of work public health agencies are already doing. We believe that as numerous people begin to be employed to bolster contact tracing efforts, our platform will be a proven benefit to accentuate the human effort with an automated solution."

HealthSpace Data Systems Ltd.

HealthSpace is a government Software as a Service (SaaS) company focused on providing efficiencies to state and local government agencies through its powerful enterprise cloud and mobile platform. Over the last decade, HealthSpace has successfully developed both cloud and mobile applications currently serving over 500 state and local government organizations across North America. HealthSpace offers one of the only self-serve enterprise suites for government, providing greater power to the end-user. Further, HealthSpace now delivers its government grade technologies to private businesses enabling them to gain visibility and predictability into their own organizations and move from a reactive to a proactive operational status. HealthSpace continues to deliver focused service and innovative solutions to government organizations, while expanding into commercial enterprise verticals to enable new customers with proactive environmental health best practices and policies. HealthSpace has now entered into the FinTech space by creating a payment platform that streamlines the intake of government revenue for the agencies it serves.
