

ACME Lithium Announces Formation of Strategic Advisory Board

Vancouver, British Columbia--(Newsfile Corp. - April 19, 2022) - **ACME Lithium Inc. (CSE: ACME) (OTCQB: ACLHF)** (the "Company", or "ACME") is pleased to announce that it has formed a strategic Advisory Board to provide counsel to ACME's executive management team and Corporate Board of Directors. The initial appointees bring extensive depth and experience in their respective fields and will provide important counsel as ACME develops its lithium projects in the United States and Canada.

Appointees include:

Paul McGuigan, P. Geo. - Technical Advisor

Mr. McGuigan is a Professional Geoscientist registered with the Association of Engineers and Geoscientists of the Province of British Columbia, with 47 years of international experience in mineral exploration, deposit evaluation, mine operations, and corporate governance. As a geochemist, he developed the mineral separation techniques now commonly employed in mineral exploration, diamond exploration, and heavy mineral sands sampling. First employed by Resource Associates of Alaska, Pechiney Ugine Kuhlmann, and Esso Minerals Canada, he operated in Canada and the United States. For the last 36 years, Mr. McGuigan has managed the Cambria group of consulting companies in North and South America, Europe, Africa, the Middle East, and the Southwest Pacific. He has served as a member of the Consulting Practice and the Geoscience Committees of the Engineers and Geoscientists of BC.

Matt Banta, PH - Technical Advisor

Mr. Banta has over 20 years of technical and professional experience in groundwater and surface water resource inventories, water development projects, and water resource management. Mr. Banta has managed and completed numerous groundwater and surface water resource investigations and inventories, hydraulic testing programs, aquifer testing programs and groundwater characterization studies throughout the world and western United States. Mr. Banta has extensive professional expertise in stakeholder engagement, environmental and natural resource studies, permitting, regulatory compliance, groundwater and surface water monitoring plans, and drilling program planning and management.

Mr. Banta earned a Bachelor of Science degree in Environmental and Natural Resource Science, with an emphasis in Hydrology from the University of Nevada-Reno and is a certified member of the American Institute of Hydrology. Mr. Banta offers diverse experience in the United States, Canada, South America, Russia, and Mexico, with focused expertise in complex water resource investigations and characterization studies for lithium brine, open pit, and underground mining projects. Mr. Banta's environmental, regulatory, and permitting experience includes, Special Use Permits, Clean Water Act compliance, USACE resource inventories and permitting, NEPA document preparation, discharge permitting, Nevada water rights permitting, and Nevada Water Pollution Control Permits.

About ACME Lithium Inc.

Led by an experienced team, ACME Lithium is a mineral exploration Company focused on acquiring, exploring and developing battery metal projects in partnership with leading technology and commodity companies. ACME has acquired or is under option to acquire a 100-per-cent interest in projects located in Clayton Valley and Fish Lake Valley, Esmeralda County Nevada, southeast Oregon and in southeastern Manitoba.

Neither the CSE nor its regulations service providers accept responsibility for the adequacy or accuracy of this news release. This news release may contain forward-looking information within the meaning of applicable securities laws ("forward-looking statements"). Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects," "plans," "anticipates," "believes," "intends," "estimates," "projects," "potential" and similar expressions, or that events or conditions "will," "would," "may," "could" or "should" occur and in this news release include but are not limited to the attributes of, timing for and expected benefits to be derived from the drilling program to be carried out on the FLV property. Information inferred from the interpretation of drilling and other sampling results may also be deemed to be forward-looking statements, as it constitutes a prediction of what might be found to be present when and if a project is actually developed. These forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ materially from those reflected in the forward-looking statements, including, without limitation: risks related to fluctuations in metal prices; uncertainties related to raising sufficient financing to fund the planned work in a timely manner and on acceptable terms; changes in planned work resulting from weather, logistical, technical or other factors; the possibility that results of work will not fulfill expectations and realize the perceived potential of the Company's properties; risk of accidents, equipment breakdowns and labour disputes or other unanticipated difficulties or interruptions; the possibility of cost overruns or unanticipated expenses in the work program; the risk of environmental contamination or damage resulting from the Company's operations and other risks and uncertainties. Any forward-looking statement speaks only as of the date it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking statement, whether as a result of new information, future events or results or otherwise.
