

## Clear Sky Initiates Claystone Study - Lab Engaged to Sample Testing -

VANCOUVER, BC (GLOBE NEWSWIRE – October 11, 2022) —**Clear Sky Lithium Corp.** (CSE: POWR) (FRA: K4A / WKN: A3DM2W) (“**Clear Sky**” or the “**Company**”), a mineral exploration and development company focused on American lithium deposits to support domestic demand, has engaged Activation Labs (ActLabs) to perform analysis to determine the types of claystone present at our properties.

A specialist in geochemical and geo-metallurgical testing, ActLabs of Ancaster, Ontario will initially be processing four (4) samples from the Clear Sky ELi property. These samples, previously announced on, [August 26, 2022](#), contain lithium concentrations up to 1,023ppm of Li. Using X-Ray Diffraction (XRD) Mineral identification (Rietvelt), ActLabs will determine the relative abundance of clay minerals. This analysis is known as speciation. The output of this study will be used in the future metallurgy work and is key for the toolbox approach that consists of a variety of exploration and processing techniques.

Company CEO, Patrick Morris, notes, “We believe unlocking claystone lithium processing is the key to an American domestic supply of lithium. As Clear Sky works towards that goal, a thorough understanding of the type of claystone we have in our projects will be part our efforts to focus on the most efficient technologies to bring our project forward. I am pleased with the effort and speed at which our team is progressing. This work forms the solid technical foundation to build on.”

Clear Sky Lithium advises the public that as part of its disclosure obligations as a public issuer, all material and regulatory filings can be found on [www.sedar.com](http://www.sedar.com). ### Forward Looking Information Disclaimer

This news release contains statements and information that, to the extent that they are not historical fact, may constitute “forward-looking information” within the meaning of applicable securities legislation. Forward-looking information may include financial and other projections, as well as statements regarding

future plans, objectives, or economic performance, or the assumption underlying any of the foregoing. In some cases, forward-looking statements can be identified by terms such as “may”, “would”, “could”, “will”, “likely”, “except”, “anticipate”, “believe”, “intend”, “plan”, “forecast”, “project”, “estimate”, “outlook”, or the negative thereof or other similar expressions concerning matters that are not historical facts. Examples of such statements include, but are not limited to, statements with respect to the claystone analysis to be performed by ActLabs, that unlocking claystone lithium processing will be a key to an American domestic supply of lithium, and that the output of the study performed by ActLabs will be used in future metallurgy work.

Forward-looking information is based on the assumptions, estimates, analysis, and opinions of management made in light of its experience and its perception of trends, current conditions and expected developments, as well as other factors that management believes to be relevant and reasonable in the circumstances at the date that such statements are made, but which may prove to be incorrect. The material factors and assumptions used to develop the forward-looking information contained in this news release include, but are not limited to, key personnel and qualified employees continuing their involvement with the Company; the Company’s ability to secure additional financing on reasonable terms; the competitive conditions of the sector in which the Company operates; and laws and any amendments thereto applicable to the Company.

Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Company to differ materially from any future results, performance or achievements expressed or implied by the forward-looking information, including, without limitation, risks relating to the future business plans of the Company; risks that the Company will not be able to retain its key personnel; risks that the Company will not be able to secure financing on reasonable terms or at all, as well as all of the other risks as described in the Company’s final long form prospectus dated May 31, 2022, under the heading “Risks Factors.” Accordingly, readers should not place undue reliance on any such forward-looking information. Further, any forward-looking information speaks only as of the date on which such statement is made. New factors emerge from time to time, and it is not possible for the Company’s management to predict all such factors and to assess in advance the impact of each such factor on the Company’s business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking information. The Company does not undertake any obligation to update any forward-looking information to reflect information or events after the date on which it is made or to reflect the occurrence of unanticipated events, except as required by law, including securities laws.
