About Melba

The Melba Property is the site of a former gold mine in the Kirkland Lake Area of Ontario which operated in the early 1900s and has a non-43-101 resource of approximately 50,000 ounces of gold in underground workings. The mineralization comprises a series of NW trending gold-bearing quartz veins. The project has been sampled and drilled by AUEX (See Press Release Dated March 6, 2023) with gold in quartz veins and disseminated sulphide mineralization being confirmed. The known mineralization, which is exposed in an outcropping surrounded by swamp has not been explored to the north or south.

About Doyle

The Doyle property is a Hemlo "look alike" in the Batchewana Greenstone Belt of Northern Ontario. Past drilling has encountered up to 42 g/t gold in quartz veins and disseminated pyrite zones. Over 37 drill holes and extensive IP and mapping have been undertaken on the property by past explorers, but the gold intersections have not been fully explored by modern methods. Recent EM and LiDAR surveys have pointed to potential shear zones associated with some of the gold zones. These form compelling targets for exploration.

About Advanced Gold Exploration Inc.

Advanced Gold Exploration (Formerly Advance United Holdings Inc.) brings an entirely different approach to the mining industry. We don't mine. Rather, we've acquired a portfolio of undervalued gold properties and are increasing their value through the application of modern technology. We have a growing pipeline of similar properties that we are looking to acquire. We are involved exclusively in the acquisition and advancement of past projects - with no intent to bring them back into production or to mine them ourselves. Our expertise is in identifying and acquiring undervalued properties with significant historical work, which were uneconomic at the time, but we believe have economic value at today's prices. We fund the re-working historic data and applying modern technology to underwrite new qualified reports, document quantifiable resources and reserves to current standards, thereby recognizing the current value. Our purpose is to bring immediate and long-term value to our partners and shareholders while seeking to eliminate exploration risk, so that we can all advance in the shortest possible time frame. For additional information about us, our projects, or to find out how we can assist in the advancement of your project contact our CEO.
