Management has continued active discussions with potential investors, joint venture partners and third parties interested in leasing or purchasing its cultivation and processing facility in Lumby. Management continued to implement cost-saving measures over the most recent month in order to extend the remaining working capital. This includes restructuring the Issuer's core team, streamlining operations, and reducing Selling, General and Administrative (SG&A) expenses. These items are in addition to the activities undertaken by management in Item 1 above.

17. **Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.**

The trends and risks which may impact the Issuer are detailed in Risk Factors - in the Issuer's Annual Information Form dated July 29, 2019 (the "AIF"), and under the section titled Risk under Financial Instruments, Risk and Capital Management section of the Issuer's Management Discussion and Analysis for the period ended December 31, 2019 and dated February 26, 2020 ("MD&A"). The AIF and MD&A are available on SEDAR.com.

The political evolution and progression of the legalities surrounding the use of hemp and cannabidiol for medical and wellness purposes continues to evolve in Canada, United States and globally, and will continue to impact and benefit the product development segment of the Issuer's business.

Over the last twelve months capital market conditions have tightened with the valuation of cannabis issuers dropping as much as 90% their value from their March highs to November lows. The volatility and market drop in the sector have made it difficult for all issuers in the sector to raise capital. Management of the Issuer expects the next six months to continue to be volatile in the sector with reorganizations, mergers and company closings dominating the news.

Management and the Board of Directors of the Issuer regularly examines and adjusts the Issuer's strategy and near-term business focus as industry changes are announced and in response to market conditions and opportunities.

The global pandemic of COVID-19 has had a tremendous impact on both the Issuer's market specifically, the capital markets as a whole, and the entire global economy. It is too early at this time to predict what the full impact of COVID-19 will be on the global economy, and as such, impossible to predict when the market will begin stabilizing. In particular, the restricted ability to access capital during COVID-19 may impact the potential solutions available to the Issuer related to its NOI Proceeding discussed in item 1 above.

Risk Factors Associated with the BIA Process:

Although the Issuer has implemented its Sales Process under the BIA and NOI Proceeding, the Issuer has outstanding payments to be made to Lind in order to satisfy its obligations pursuant to the "Notice of Event of Default, Investigation of Event of Default of Reservation of Rights" letter received from Lind. FTI will continue to work with the Issuer throughout the process.

Under the terms of the NOI Proceeding, if the Issuer fails to successfully restructure its indebtedness through an approved proposal, the Issuer will become bankrupt.

While the Issuer continues to restructure, investments in the Common shares (the "Shares") of the Issuer will be highly speculative. Although the Issuer's Shares continue to trade on the Exchange, the trading prices of the Shares may have little or no relationship to the Issuer's actual business.
