

CROP TO EXPAND WASHINGTON STATE PROJECT

VANCOUVER, BRITISH COLUMBIA- March 14, 2018 – CROP Infrastructure Corp. (CSE:CROP) (FRANKFURT:2FR) ("CROP" or the "Company") today announced it has received an update from it's state- of-the-art Washington State Mega Greenhouse project.

Phase one construction consisting of site preparation including foundations for twelve (12) purpose-built indoor agricultural canopies encompassing a planned total area of ~44,000 square feet is nearing completion. The first six (6) greenhouses are currently under construction with completion anticipated shortly.

Each phase will be licensed to tenant growers along with brand licensing and Standard Operating Procedures (SOPs).

The Company will shortly begin Phase 2 construction of the next group of six (6) greenhouses planned for the property, bringing another 22,000 square feet of canopy online. Completion of the greenhouses as planned will bring the project's annual tenant production capacity to approximately 24,000 lbs of high quality product.

The Mega Greenhouse project currently benefits from a regional electrical rate of \$0.02/kWh USD which based on internal calculations provided by the company's expert consulting partner, should result in less than \$150.00 USD per lb (\$0.33 per gram) production costs for it's tenant growers.

In related news, the Company further announces that it has granted a total of 5,500,000 incentive stock options to certain directors, officers, consultants and employees of the Company. The options have an exercise price of \$0.50 per share and expire March 13, 2019.
