

EVITRADE Health Systems Corp Launches New Web Site and Outlook for the Company

VANCOUVER, BC, Thursday May 24, 2018 – EVITRADE Health Systems Corp. (CSE: EVA, OTCQB: AXHLF) (the “Company”) announces that it has reimaged its look and presence to correspond to its expanding evolution in the medical technology, health and life sciences worlds.

“As a Company that has primarily focussed on autonomous medical care, we continually bump up against the intersection of the device world and the biology of wellness. We realize that in order to grow and be successful with these two disciplines that co-exist and add value to each other; both need to be part of our Company’s development” said Ron Ozols, Director of the Company. “We see tremendous value in partnering or acquiring projects that offer this opportunity. We are interested in projects that make protocols better and more effective within the human condition. There have been significant strides made in molecular biology and the genetics of plants that increase bioavailability and efficacy for nutraceutical and pharmaceutical protocols that are of high interest to us. From Astaxanthin to Spirulina and Zeolites there is much research and new developments are beginning to emerge.”

Management continues to strive to seek optimal business and commercialization strategies for the Company, including the recent acquisition of the Artillery Labs platform, and various other opportunities currently being pursued. This, with the recent re-engagement of Haywood Securities for financial advisory services, and with Mr. C.K. Cheung as the new CEO, the Company is moving forward for a exciting and robust future.
