EVIANA Begins Commercial CBD Production in Serbia

VANCOUVER, BC, AND TORONTO, ON, September 7, 2018 – Eviana Health Corporation (the “Company”) (CSE: EHC) (OTC: EVNNF) (www.eviana.ca) is pleased to announce the Serbian operating company has begun commercial production of cannabidiol (“CBD”) utilizing Supercritical CO₂ extraction.

“We are pleased with Vitalis’ commitment to ensure the successful commissioning of their extraction system and with the start of commercial extraction,” said Avram Adizes, CEO of Eviana Health Corporation. “With commercial operations now under-way, we can continue to execute the business objectives of that we have planned for Eviana Health.”

The Company has an option to acquire the Canadian parent company that owns the Serbian extraction entity and operations. In addition to the extraction facility, there is approximately 60 tonnes of dried hemp ready for sorting and extraction. The current year’s harvest of over 250 hectares is expected to yield up to an additional 250 metric tonnes of dried hemp for sorting and extraction. With CBD extract commanding significant market prices per kilogram, the revenue potential from the Serbian operation is promising.

About Vitalis Extraction Technology

Vitalis (www.vitaliset.com) is a privately-owned Canadian based engineering and manufacturing company that has become one of the world’s leading manufacturers of industrial sized supercritical CO₂ extraction systems for the cannabis industry.

About Eviana Health Corporation

Eviana Health Corporation is a Canadian Securities Exchange listed company that was established with the aim of delivering customized consumer health care products using natural hemp strains of cannabis sativa for cannabinoid-based topical creams and products and cosmeceutical and nutraceutical merchandise.
