

## **DATA DEPOSIT BOX Receives QNAP Certification**

TORONTO, June 6, 2018 (GLOBE NEWSWIRE) -- Data Deposit Box Inc. ("Data Deposit Box") (CSE: DDB, OTCQB: DDBXF, Frankfurt: 2DD) announced today, the Data Deposit Box application has been certified by QNAP Systems Inc.

The announcement enables QNAP customers worldwide to protect their servers, desktops, laptops, mobile devices and Network Attached Storage (NAS) devices, using the Data Deposit Box application. It's expected that the announcement will help Data Deposit Box grow total storage under management, by providing the company with access to millions of potential end-points.

QNAP customers can now purchase the Data Deposit Box application via the QNAP App Center - an online store for purchasing QNAP add-on products that are certified to work with QNAP products.

"The QNAP certification allows us to deliver on two important commitments. First, to provide seamless integration with products that complement our offering. Second, to continue our investment in the enhancement our portfolio." said Tim Jewell, CEO, Data Deposit Box. "We're proud to be an official partner in the QNAP community, and believe this announcement will give QNAP customers and partners access to the best cloud backup solution on the market."

For more information about the QNAP App Center, or to purchase the Data Deposit Box application, visit: [https://www.qnap.com/en/app\\_center/](https://www.qnap.com/en/app_center/)

### **ABOUT DATA DEPOSIT BOX:**

Providing advanced, cloud-based data back-up since 2002, Data Deposit Box is one of the world's first and foremost data backup, protection and recovery providers for Managed Service Providers (MSPs), as well as Small and Medium Businesses (SMBs). Data Deposit Box offers full white labeling for larger MSPs. Based in Toronto, Canada, Data Deposit Box is trusted by over 5,000 MSPs, SMBs and personal end-users world-wide to make data back up as simple and smart as possible. Our recently introduced Secure Email Archiving has great potential in the larger Enterprise market as well as in our existing market. Data Deposit Box has refactored components of its existing cloud platform to develop products for the Blockchain industry. ProActiveMSP, patented web based remote device management software that does not require a Virtual Private Network (VPN), serves markets such as Network Attached Storage (NAS), printers, routers, firewalls, etc. Applications also exist for the Internet of Things (IOT) which involves products for the Consumer, Business and Public markets.
