

EviTrade Provides Update on Hemp Based Extraction and Processing Facility

VANCOUVER, BC, Thursday February 28, 2019 – EVITRADE Health Systems Corp. (CSE: EVA, OTCQB: EVAHF) (the “Company”) provides an update on its hemp extraction facility in Nevada.

EviTrade is pleased to report that the development of its Nevada based hemp extraction facility is ahead of schedule. Over the past few months, Mr. Brown, President of Western Agri Solutions Supply Corp (“WASSC”), a wholly owned subsidiary of EviTrade, has made great strides in the process of bringing the facility on-line.

“We have been singularly focused on bringing our processes into revenue producing status. Accordingly, we have cleared most of our operating permits and are moving rapidly to achieving our processing licenses.” Said Mr. Brown. “When completed, our facility will be able to process enough hemp to produce approximately 200Kgs of CBD isolate per month. With this volume of throughput, we will be able to satisfy our sales channels with our line of premium CBD based products subject to applicable federal and local laws.”

WASSC is an agricultural supply company focused on sourcing and processing industrial hemp. Through utilization of a proprietary industrial-grade extraction system, WASSC is setting up to offer CBD based health and wellness products based on extracts from industrial hemp.

EviTrade continues to fulfill its commitment to elevate the human condition through advanced medical technology solutions for effective health and wellness research and products.
