

CROP'S FIRST CALIFORNIA EXTRACTS PASS PESTICIDE AND HEAVY METAL TESTING

July 24th, 2019 - VANCOUVER, BRITISH COLUMBIA - CROP INFRASTRUCTURE CORP. (CSE: CROP) (OTC: CRXPF) (Frankfurt: 2FR) announced today that its first batch of THC distillate cartridges derived from the 2018 harvest have passed heavy metal and pesticide testing consistent with the excellent initial test results after the 2018 harvest.

The packaging team has now resumed filling cartridges in preparation of the launch of Evolution Cannabis and Hempire brands in California.

Furthermore, the first two greenhouses at the Humboldt organic farm have been harvested and are awaiting trimming, testing and packaging.

This will allow to the company to launch its premium distillate line and organic fresh flower SKUs into the California market through internal sales and the partially owned Flip Distro, giving sales teams a full suite of products to offer retailers.

CROP CEO, Michael Yorke, stated: “This is a solid step forward rolling out our cartridge, flower and pre-rolled lines into the California market, further benefiting from the recent, partial acquisition of Flip Distro with its experienced sales staff.”

About CROP

CROP is publicly listed company trading under symbol CROP.CSE. The company is focused on cannabis branding and real estate assets. CROP's portfolio of projects includes cultivation properties in California, two in Washington State, a 1,000-acre Nevada cannabis farm, 2,115 acres of Hemp CBD farms, and a growing portfolio of common share equity in upcoming listings within the cannabis space.
