1.12 Critical Accounting Estimates

The preparation of condensed consolidated interim financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which affect the application of accounting policies and the reported amounts of assets, liabilities and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected. The determination of listing expense, valuation of shares and warrants deemed issued in connection with the reversed acquisition, and the assumptions and models used for estimating fair value for share-based payment transactions constituted significant areas of estimates.

Critical judgements in applying accounting policies that have the most significant effect on the amounts recognized in the condensed consolidated interim financial statements include the following:

- the determination of whether or not an investment is considered a joint arrangement or an investment in associates
- the collectability of loans and advances
- the determination of deferred income tax assets and liabilities
- the evaluation of the Company's ability to continue as a going concern

1.13 Changes in Accounting Policies

The Company adopted IFRS 16 Leases for the period ended May 31, 2019. The mandatory adoption of the accounting standards and interpretations had no significant impact on the Company's condensed consolidated interim financial statements for the current year or prior year presented.

1.14 Financial Instruments and Other Instruments

The Company is exposed to varying degrees to a variety of financial instrument related risks:

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge any obligations. The Company's cash and receivables are exposed to credit risk. The Company reduces its credit risk on cash by placing these instruments with institutions of high credit worthiness and the loans and advances will be secured by the assets of DVG which mitigates the credit risk

Fair value

The carrying value of cash approximated the fair value because of the relatively short-term nature of these instruments.

Interest rate risk

Interest rate risk is the risk the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Financial assets and liabilities with variable interest rates expose the Company to cash flow interest rate risk. The Company does not hold any financial liabilities with variable interest rates. The Company does maintain bank accounts which earn interest at variable rates but it does not believe it is currently subject to any significant interest rate risk.

Liquidity risk

The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances and through short-term borrowing. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments.

Financial assets and liabilities measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The fair value of loan and advances and accounts payable approximate fair value due to the short term nature of the financial instruments. Cash is classified as fair value through profit or loss and is measured using level 1 inputs of the fair value hierarchy.

1.16 Commitments and Contingencies

- On August 14, 2018, the Company signed a Letter of Intent with Naturally Splendid Enterprises for development and manufacturing of various products and beverages.
- As described in Note 4, the Company has committed to providing advances to its associates.
- Subsequent to period end, a lawsuit was filed against the Company by a former contractor and trades person. Since it presently is not possible to determine the outcome of this matter, no provision has been made in the financial statements. The resolution could have a significant effect on the Company's earnings in the year that a determination is made; however, in management's opinion, the final resolution of all legal matters will not have a material adverse effect on the Company's financial position.

Risk Factors

The Company is focused on more select market introduction and development. The failure to generate future sales in the Company's main products could have a significant and adverse affect on the Company.

The Company success will depend in large measure on certain key personnel. The loss of the services of such key personnel could have a material adverse affect on the Company. The Company does not anticipate having key person insurance in effect for management. The contributions of these individuals to the immediate operations of the Company are of central importance. In addition, there can be no assurance that the Company will be able to continue to attract and retain all personnel necessary for the development and operation of its business.

The Company has incurred a net loss for the period ended May 31, 2019 of \$3,375,352 and has a deficit of \$19,418,869. Management is continuing efforts to attract additional equity and capital investors and implement cost control measures to maintain adequate levels of working capital. Nevertheless, there can be no assurance provided with respect to the successful outcome of these ongoing actions. If the Company is unable to obtain additional financing on reasonable terms, the Company may be required to curtail or reduce its operations to continue as a going concern.

In addition, the Company's limited working capital could affect the Company's ability to seize upon opportunities requiring investment, or to reinvest in its products in a timely manner.
