Date: [November 5, 2020 \(for the month of October, 2020\)](#)

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer’s obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer’s ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are “material information” as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term “Issuer” includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer’s business and operations over the previous month. Where the Issuer was inactive disclose this fact.

[The Issuer is a Canadian gold exploration company based in Vancouver. The Issuer seeks exciting data rich gold projects with low capital requirements. The Issuer holds a 100% interest in three Canadian gold projects, the Sixty Mile Project located in within west-central Yukon Territory, the New Brenda project located in the Similkameen, Nicola, and Osoyoos Mining Divisions, BC and the](#)

Ashuanipi Project located 30 to 90 kilometres west and north-west of Schefferville, Quebec, and within the Ashuanipi Complex in the northeastern portion of the Superior Province, Quebec.

2. Provide a general overview and discussion of the activities of management.

During the month of **October 2020**, management's principal activities consisted of:

- providing an update on its exploration campaign in the Yukon on its Sixtymile project;
- completing land acquisitions adjacent to the Sixtymile project in the Yukon the Ashuanipi gold project in Quebec;
- issuing stock options to directors, officers and consultants;
- replacing Adam Sung Kim Ltd. as auditor of the Issuer in favour of Smythe LLP, Chartered Accountants;
- appointing Thanos Belivanakis to the Issuer's Advisory Board; and
- Attending to general management and administrative matters.

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

During the month of **October 2020**, the Issuer announced the results of a late season exploration campaign in the Yukon on its Sixtymile project.

Highlights of the exploration campaign included:

- Multiple zones with arsenic and gold XRF-detected
- 835m of RAB drilling completed
- 250m of trenching completed
- 88 historical drill samples sent for assay
- Possible auriferous arsenopyrite-quartz veins discovered in trenching

Over the exploration campaign, a total of 835m was drilled over several geophysical and geological targets. The Issuer also completed 250m of trenching, 60 line-km (75 km total for 2020) of ground geophysics and relogged the historic drill core on site.

Historic drill core highlights the potential for an orogenic gold system with a possible epithermal overprint on the Sixtymile property. Gold is hosted within quartz veins and sericitized and clay altered faults. Faulting was concurrent with and postdated fluid flow and gold precipitation. The epithermal overprint is evident as pyritiferous silica sinter (drillhole SM20-06 and SM20-07).

Trenching over a geophysical and geochemical anomaly has revealed several massive arsenopyrite and quartz veins. Arsenopyrite is considered an indicator mineral and arsenic has historically been weakly correlated (R2 =0.6) to gold. About 130 chip and grab samples have been submitted to MS Analytical for assays.

The drill holes targeted different fault sets and their intersections. Arsenic anomalies occur close to the surface in several holes. Preliminary handheld XRF analysis indicate the largest arsenic anomaly was in hole SM20-14 and contained 0.42% arsenic from 25.9 to 27.4m. Other arsenic anomalies over 0.1% occurred in hole SM20-01, SM20-09, SM20-10, SM20-12, SM20-14 and SM20-15. The cause of the arsenic anomalies are veins and disseminations of arsenopyrite.

The XRF identified gold around the detection limit (15 ppm) in drill hole SM20-09 from 4.6 to 6m, SM20-10 from 48.8 to 50.3 m, SM20-14 from 25.9 to 27.4 m and in SM20-15 from 35.1 – 36.6 m and from 38.1 to 39.6 m. All gold measurements are associated with highly anomalous arsenic. Gold is measurements in handheld XRF systems should be considered preliminary in nature. Samples have been sent to MS Analytical for assay.

The Issuer also completed strategic staking and acquired 120 contiguous claims adjacent to the Sixtymile project and 47 contiguous claims adjacent to the Ashuanipi gold project.

The MD&A is available on the Issuer's SEDAR profile at www.sedar.com.

In addition to the trends and risks detailed in the MD&A, COVID-19 is likely to impact the Issuer:

COVID-19

The outbreak of the corona virus pandemic has impacted the Issuer's plans and activities. The Issuer may face disruption to operations, supply chain delays, travel and trade restrictions and impact on economic activity in affected countries or regions can be expected and can be difficult to quantify. Such pandemics or diseases represent a serious threat to maintaining a skilled workforce industry and could be a major health-care challenge for the Issuer. There can be no assurance that the Issuer's personnel will not be impacted by these pandemic diseases and ultimately that the Issuer would see its workforce productivity

reduced or incur increased medical costs/insurance premiums as a result of these health risks. In addition, the COVID-19 pandemic has created a dramatic slowdown in the global economy. The duration of the COVID-19 outbreak and the resultant travel restrictions, social distancing, Government response actions, business closures and business disruptions, can all have an impact on the Issuer's operations and access to capital. There can be no assurance that the Issuer will not be impacted by adverse consequences that may be brought about by the COVID-19 pandemic on global financial markets may reduce resource prices, share prices and financial liquidity and thereby that may severely limit the financing capital available.
