## ABOUT EXMCEUTICALS

EXM is an emerging bio-sciences company targeting the wellness and medical applications of cannabinoids and terpenes. EXM Portugal operation was recently granted the required authorizations and permits in Portugal for its existing laboratory and pilot refinery for cannabis research. EXM has previously completed research projects with its university partners, Universidade Nova de Lisboa and Universidade Lusofona as well as applying for P2020 research grants. Following receipt of these unique Portuguese cannabis authorizations and permits, EXM Portugal is proceeding with its planned R&D program, lab work and testing.

In addition to this more scientific mandate, EXM is now projecting and building a significantly larger and additional facility in Portugal which will operate as an EU-GMP refinery. Once complete and licensed this industrial refinery will be used by EXM as its base for the distribution of cannabis ingredients in the EU and North America on a commercial basis. EXM's activities are focused on the production of high-grade cannabis and hemp ingredients for the pharmaceutical, therapeutical, nutraceutical and cosmetic industries. The Company proposes to sell the produced ingredients to international medical markets.
