

Press Release

Bam Bam Completes First Hole at the Majuba Hill Property

VANCOUVER, BC — May 19, 2020 — Bam Bam Resources Corp. (CSE: BBR / OTC: NPEZF / FSE: 4NPA) ("**Bam Bam**" or the "**Company**") is pleased to report that it has completed the first core hole for the 2020 Phase 1 drilling program at its flagship Majuba Hill Property (the "**Property**"), a copper, gold porphyry project located in Pershing County, Nevada.

The hole was designed to expand the copper, gold, and silver mineralization identified in the historic drill data. The hole was halted after intersecting historic workings. Hole MHB-1 is a vertical core hole drilled to 311.5 feet (94.9 M).

The core was logged on-site and will be sawn and sampled by Bam Bam contractors at the secured warehouse facility in Elko, Nevada. Samples will then be submitted to ALS Geochemistry for sample analysis.

Mr. David Greenway, President & CEO, reports: "We are glad to have the Majuba Hill project drilling underway. Following an extensive period of compilation and planning, it is good to finally have core in the box. The alteration and rocks in the core are what our geologists expected and I am looking forward to getting the analytical results from ALS."

MHB-1 Box 22 - 239.5 to 248.5 Feet

MHB-1 Box 24 - 257 to 266 Feet

Bam Bam field personnel and contractors are using operational health and safety protocols consistent with ensuring the health and safety of its people, the local community, and the State of Nevada. The drill program is being managed by Bam Bam's Exploration Geologist, E.L. "Buster" Hunsaker III, a Qualified Person as defined by NI 43-101. He is a Certified Professional Geologist (CPG 8137) with the American Institute of Professional Geologist.

The Majuba Hill Project encompasses 4,822 acres of surface and mineral rights that includes 3 patented lode mining claims and 632 acres of privately-owned surface and minerals. The Property is easily accessed via 23 miles of well-maintained dirt roads leading from U.S. Interstate 80.

The scientific and technical information contained in this news release has been reviewed by E.L. "Buster" Hunsaker III, CPG 8137, Chairman of the Company's Advisory Board, an independent consulting geologist who is a non-independent Qualified Person as such term is defined under *National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43- 101")*.
