MONTHLY PROGRESS REPORT

Name of Listed Issuer: **PUDO Inc. ("PUDO" or the "Issuer")**

Trading Symbol: **PDO**

Number of Outstanding Listed Securities: **27,117,584**

Date: **January 7, 2022**

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

PUDO is North America's first pick-up and drop-off service that is carrier-neutral ("Network"). Its large Network of convenient locations ("PUDOpoint Counters") ensures reliable and secure delivery where you want it, when you want it. The Issuer is working closely with previously acquired customers to optimize procedures and expand the Network to provide them services where and as they need it. Management of the Issuer continues to work on additional integrations with customers to grow parcel volumes while pursuing new customers and strategic partners.

During the COVID-19 pandemic, the Issuer's employees continued to work from home to manage the PUDO Network in support of its partners. To date, PUDO has been able to continue operations throughout the COVID-19 crisis. As a result of COVID-19 the Issuer did continue to experience a decrease in parcel volume for some services as compared to prior periods, but it has been offset by additional services being utilized by our partners (i.e., customer drop off of parcel at PUDOpoint Counters for consolidated courier pickups). The PUDO Network continues to show its value as most of the PUDOpoints, that form the PUDO Network, remain open during COVID-19 shut-downs of local services and/or operations implemented by local governments.

Working with existing partners and potential new partners the Issuer continues to actively recruit and add new PUDOpoint Counters to support the various requirements and PUDO services requested by the Issuer's partners.

During the month, the Issuer continued to partner with a large Canadian e-commerce retailer by providing PUDOpoint Counters as an alternative direct shipping address for their customers. During the month, the Issuer continued to support large U.S. e-commerce retailers by providing PUDOpoint Counters for an alternative direct shipping address for their customers. The e-commerce retailers requested that the Issuer continue to expand the PUDO programs into additional PUDOpoint Counters across the PUDO Network. These locations are displayed

as alternative delivery locations during the e-commerce retailers' customer checkout process. Approximately 800 PUDOpoints Counters are being displayed as alternative delivery locations during the retailers' customer checkout process and the Issuer continues to actively expand this Network.

During the month the Issuer continued to work with online US vaping retailers to integrate PUDO's API into their check out process to enable their customers to select PUDOpoint locations as alternative delivery locations for their vaping products.

Working with a current partner, the Issuer expanded their returns program during the month to include a large ecommerce retailer that requires a cost effective and efficient returns program that consolidates their returns packages for distribution and export back to the UK. The expanded program includes a label that is identified as a PUDO Label. This label with includes a label number, a bar code for scanning, and identifies the retailer that the customer is returning their order to. The customer drops off the returns parcel with the attached PUDO label at any participating PUDO location within the PUDOpoint Network as a drop off for pickup and returns consolidation by PUDO.

2. Provide a general overview and discussion of the activities of management.

Management of the Issuer continued to work with the Issuer's existing partners to manage the evolving PUDO Network and services, while continually pursuing new strategic opportunities that would enhance and expand the PUDO Network and service offerings to create shareholder value.

During the month management continued to strategically invest in software development to enhance and add new functionality and services to the Issuer's software technology while managing the API integrations of PUDO's various service offerings, including the PUDOpoint Counters network, with current and new partners and for PUDO Members.

This investment in software development includes the ability for PUDO to create and issue its own PUDO Shipping Label for customers to print, adhere to their returns package, and drop off at a location that is part of the PUDOpoint Counters network. This process enables a cost-efficient returns program for PUDO's various partners. After the completion of the launch in Canada the returns program will be expanded in the US..
