FORM 7

MONTHLY PROGRESS REPORT

Name of Listed Issuer: Carl Data Solutions Inc. (the "Issuer")

Trading Symbol: CRL

Number of Outstanding Listed Securities: 126,424,783

Date: July 7, 2021

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

(a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.

(b) The term "Issuer" includes the Issuer and any of its subsidiaries.

(c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

   On June 29, the Issuer announced that it became a member of the LoRa Alliance®, a non-profit association with over 500 members dedicated to advancing the adoption and implementation of the low-power long-range wide-area networking LoRaWAN® standard.

   LoRa stands for Long Range. The LoRaWAN connectivity standard is a proprietary low-power wide-area wireless radio frequency technology that is particularly well suited to remote or hard-to-reach application environments where conventional connectivity standards are either too expensive, unreliable or unavailable to implement.

   Carl Data Solutions has already implemented a LoRaWAN network in the Kootenay Region of British Columbia for the Fresh Water Data Commons Project. The project was sponsored with $4.65 million of funding in a Master Project Agreement with Canada's Digital Technology Supercluster.

   According to Semtech, the founding member of the LoRa Alliance, the LoRaWAN connectivity standard is the de facto wireless platform of Internet of Things (IoT). LoRa devices and the open LoRaWAN standard enable smart IoT applications that solve some of the biggest challenges facing our planet: energy management, natural resource reduction, pollution control, infrastructure efficiency, disaster prevention and more.

   While the LoRaWAN standard is popular in Europe and other overseas countries it is relatively new in North America. Carl Data Solutions is one of only eight Canadian members that include six other companies and the University of Saskatchewan.

   The issuer will lend its deep Artificial Intelligence and Machine Learning expertise to the LoRaWAN ecosystem as it evangelizes the benefits of LoRaWAN connectivity to customers and prospects through the LoRa Alliance. While the Issuer implements and promotes this strategic technology, it will build its business development profile with LoRa Alliance members for our AI-enabled time-series data monitoring such as Environmental Monitoring as a Service, or EMaaS. EMaaS is increasingly in demand for large infrastructure projects to help meet national and international environmental compliance mandates.

2. Provide a general overview and discussion of the activities of management.

   The Issuer continued assimilating its new executive team recruited to fill key roles in business development, corporate marketing, technical operations and product management. The team was hired in March, with the objective of establishing the foundation for the Issuer's next stages of product development, new customer acquisition and brand awareness.

   Attention paid to social media and leveraging the social media channels of partner organizations has significantly raised the profile of the issuer with investors who participate in social media. For example, in the three-month period dated January 1 through to March 31, the Issuer's Twitter analytics showed 12,400 impressions during the period, as compared to the most recent three-month period dated April 1st to June 30th where the Issuer's Twitter analytics showed 26,000 impressions – a 110% increase over the previous period. The LoRa Alliance's Twitter account posted information on the Issuer's new membership twice in June to its 15,600 technology industry Followers, and also posted this information on its Facebook site (21,300 Followers) and LinkedIn site (18,800 Followers).
