

EV Battery Tech Signs Exclusive Agreement to Install IoniX Pro Smart Chargers

Major property developer enters into exclusive agreement to install IoniX Pro Smart Chargers on all of their projects

Vancouver, B.C. June 2, 2021 – Extreme Vehicle Battery Technologies Corp. (the “**Company**” or “**EV Battery Tech**”) (CSE: **ACDC**) is pleased to announce that it has signed an exclusive agreement with Fairwater Properties (“**Fairwater**”) by which Fairwater agrees to use EV Battery Tech exclusively as its provider of energy storage system (**ESS**) and electric vehicle (**EV**) charging solutions for all of their current and upcoming projects.

Fairwater is a large Vancouver property developer that handles a spectrum of projects from High-Rise projects to Townhome and Duplex sites, working not only in British Columbia but in several Western Canadian provinces.

“The opportunity to work with a strong partner that can take care of our energy needs as we move forward will be priceless as we expand,” mentioned Fairwater executive, Ketan Ladva.

Plans are moving forward for the EV Battery Tech technical team to do a deep dive with Fairwater’s engineers to elaborate on their exact needs. A high-rise development, a townhome development and several duplex developments are amongst the first targets for the group to do a needs assessment on.

“This is a positive sign that North American builders have a need for our forward-thinking products,” commented EV Battery Tech CEO, Bryson Goodwin. *“Considering the small-, medium- and large- size projects Fairwater is currently engaged with, the need for a variety of products from SmartWalls to Smart Charging Stations to TITANs is evident.”*

“Smarter use of energy is becoming increasingly important as governments continue to mandate strict guidelines to builders. In our view, early adapters will have a significant advantage in the coming years,” added Fairwater CFO, Vipul Pachchigar.

On Behalf of the Company,

Bryson Goodwin,
Chief Executive Officer

About EV Battery Tech

Extreme Vehicle Battery Technologies Corp. is a blockchain and battery technology company with revolutionary, patented Battery Management Systems (BMS) designed to meet the growing demand for scalable, smart solutions for the rapidly growing Electric Vehicle (EV) and Energy Storage Solution (ESS) markets. The Company has committed to assisting global recycling solutions by offering recycling initiatives using their technology to analyze and fully refurbish used batteries.
