

## FORM 7

### MONTHLY PROGRESS REPORT

Name of Listed Issuer: MEGAWATT LITHIUM AND BATTERY METALS CORP.  
(the "Issuer").

Trading Symbol: MEGA

Number of Outstanding Listed Securities: 64,353,900

Date: August 1, 2021

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

#### **General Instructions**

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

#### **Report on Business**

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Issuer announced (via press release dated July 8, 2021) additional information outlining the potential of the Kodiak project in New South Wales, Australia. The project is prospective for lateritic Nickle-Cobalt-Scandium mineralization associated from 'Alaskan- Type' ultramafic intrusives that are found along the Lachlan Orogen. The

project is proximal (approximately 5.7 kms) to Scandium International Mining Corp's Nyngan project, reported to have a mine life of approximately 20 years. The Honeybugle Scandium Project to the south of Kodiak is also a successful project. Kodiak enjoys readily accessible infrastructure as the tenure is within proximity to an interstate highway, main roads, railways, regional airports, powerlines, water and the towns of Cobar and Dubbo. The Kodiak project area has not been explored for Ni-Co-Sc, Cu and HPA. However, the project is underpinned by the same intrusive geology and geophysical anomalies that have been recognised as rich lateritic Ni-Co-Sc deposits located in nearby tenures. The anomalies appear similar to the ophiolite intrusion seen in Scandium International's neighbouring Nyngan Project Area.

The Issuer announced (via press release dated July 8, 2021) that it has engaged Orix Geoscience of Toronto, Ontario to conduct its upcoming field program at the Route 381 Lithium project in the James Bay Quebec region. Orix is a Canadian geological consulting firm advancing strategic exploration and mining through the integration of data and innovative geological understanding. High grade lithium has been sampled on the project site (surface grab sample at 2.77% Li<sub>2</sub>O) and linearly extensive spodume-pegmatites identified. The field program is scheduled to commence the fourth week of July and will consist of prospecting, mapping, and channel sampling to identify addition pegmatites and drill targets.

The Issuer announced (via press release dated July 22, 2021) that SJ Geophysics has completed a 22.8 line kilometre induced polarization (IP) survey on the Company's Cobalt Hill target areas. In each of the 3 areas (Meister, Cobalt Zone and Gold Soil anomaly zone) the IP survey was successful in defining geophysical features that support the known geological and geochemical response in these three areas. The results of the survey have significantly contributed in confirming drill targets to test these three areas.

2. Provide a general overview and discussion of the activities of management.

See Item 1

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

See Item 1

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.

N/A

5. Describe any new business relationships entered into between the Issuer, the Issuer's affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship.

See Item 1

6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced.

N/A

7. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how the consideration was determined and whether the acquisition was from or the disposition was to a Related Person of the Issuer and provide details of the relationship.

N/A

8. Describe the acquisition of new customers or loss of customers.

N/A

9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trade-marks.

N/A

10. Report on any employee hirings, terminations or lay-offs with details of anticipated length of lay-offs.

N/A

11. Report on any labour disputes and resolutions of those disputes if applicable.

N/A

12. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings.

N/A

13. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness.

N/A

14. Provide details of any securities issued and options or warrants granted.

| <b>Security</b> | <b>Number Issued</b> | <b>Details of Issuance</b>                      | <b>Use of Proceeds<sup>(1)</sup></b> |
|-----------------|----------------------|---|--------------------------------------|
| Common shares   | 58,739               | Exercise of warrants at \$0.15 per common share | Working Capital                      |

*(1) State aggregate proceeds and intended allocation of proceeds.*

15. Provide details of any loans to or by Related Persons.

N/A

16. Provide details of any changes in directors, officers or committee members.

N/A

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

The Issuer believes that the COVID-19 Pandemic will likely have only a minimal impact on the Issuer's activities, most notably in curtailment of travel and access to mineral projects due to travel and social distancing restrictions. There is no material disruption to the Issuer's operations.

The Issuer is a public junior mining issuer involved in exploration activities and is subject to the market fluctuations and volatility experienced by junior exploration and development issuers in British Columbia and world-wide in recent years.

Resource exploration and development is a speculative business, characterized by a number of significant risks. The long-term profitability of the Issuer's operations will in part be directly related to the costs and success of its exploration programs.

Metal prices have fluctuated widely, particularly in recent years. Consequently, the economic viability of any of the Issuer's exploration projects cannot be accurately predicted and may be adversely affected by fluctuations in mineral prices.

## Certificate Of Compliance

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there were no material information concerning the Issuer which has not been publicly disclosed.
3. The undersigned hereby certifies to the Exchange that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all Exchange Requirements (as defined in CNSX Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.

Dated August 1, 2021.
