

FORM 7

MONTHLY PROGRESS REPORT

Name of Listed Issuer: Global Cannabis Applications Corp. (the "Issuer" or "GCAC")

Trading Symbol: APP

Number of Outstanding Listed Securities: 179,145,424 (as at September 30, 2021)

Date: October 6, 2021

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

- 1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.**

The Issuer is a global leader in designing, developing, SaaS licensing and acquiring innovative data technologies for the medical cannabis industry. Its Citizen Green and Efixii platforms are the world's first end-to-end - from patient to regulator - medical cannabis data solutions. They use six core technologies: mobile applications, artificial intelligence, RegTech, smart databases, Ethereum blockchain and GCAC smart rewards. These technologies transparently disclose cannabis chain-of-custody events, thereby enabling patients to provide crowd-sourced medical cannabis efficacy data. Driven by digital and cannabis industry experts, the Issuer is focused on generating revenue from SaaS licensing its technology and acquiring high quality cannabis datasets that improve patient outcomes and to become the world's largest cannabis efficacy data provider.

During the month of September 2021, the Issuer actively continued general and corporate operations.

Global Outbreak of COVID-19 Disclosure: The actual and threatened spread of the virus globally has had a material adverse effect on the regional economies in which the Issuer operates and could continue to result in negative impacts on the stock market, including trading prices of the Issuer's shares and the ability to raise capital, and could impact the Issuer's operations.

2. Provide a general overview and discussion of the activities of management.

During the month of September 2021, management continued to support and control the Issuer's business activities and develop the Issuer's business with a focus on creating broader awareness of the Issuer and continued development of product line.

On September 2, 2021, the Issuer announced by way of news release that it used a percentage of its quarterly revenues to buyback the GCAC token on Uniswap^[1] as part of its marketing campaign aimed at the one million decentralized finance user community^[2].

The DeFi community is a key market demographic for the Issuer, as they are consumers that have disposable income, are under 34 years old and increasingly drawn to the use of cannabis products^[3]. This multi-year marketing campaign aims to raise awareness of the Issuer by engaging in a DeFi token buyback program on the Ethereum and Binance Smart Chain^[4] blockchains.

The Issuer is publicly traded with audited financials and makes accurate revenue disclosures. GCAC has committed to a token buyback-spend of at least 1% of its quarterly revenues. Each token-buy should lead to greater awareness of the Issuer. This quarters buyback was US\$2,000.

Prior to the buyback, GCAC tokens were trading at \$5.12 on Uniswap and \$4.51 on Pancakeswap. On April 8, 2021, the Issuer acquired 100,000 tokens for \$0.20 each and this buyback adds approximately 350, Ether cryptocurrency denominated, tokens to the Issuer's balance sheet. On April 8, 2021, Ether cryptocurrency was trading at US\$2,081 and today is trading at US\$3,500.

The Uniswap GCAC marketing token is built and operated by [Abbey Technology](#).

On September 7, 2021, the Issuer announced by way of news release that the formal approval of the Efixii blockchain-based cannabis compliance technology by the Israel government for its commercial use in cannabis cultivation research for Israeli cultivators.

Bless Cultivation's approval from the Israeli Medical Cannabis Unit ("Yakar") to formally research the "production capacity of cuttings from a mother plant, without creating a stressful situation for the source plant, as a function of time." A prerequisite of the approved research methodology is the Bless Cultivation mandate to use the Issuer's Efixii blockchain-based mobile app for managing, recording, and delivering reliable insights across all the study periods. The Efixii methodology has been shown to yield better patient outcomes when its ultra-reliable data is used.

The Issuer's blockchain-based Efixii mobile app securely logs all data attestations to the blockchain for full transparency. The Issuer's artificial intelligence and deep learning algorithms yield important data insights for government research initiatives and help develop a better understanding of cultivation principles. This approval allows Bless Cultivation, and others, to immediately

commence cultivation without waiting to complete the physical site development (security systems, etc.) thereby lowering the funding burden for cultivation commencement.

On September 21, 2021, the Issuer announced by way of news release that the ‘*Advancements*’ TV Series ^[1], hosted by Golden Globe-winning actor Ted Danson ^[2] will explore how the Issuer developed its patent-pending Efixii smartphone app and the benefits it brings to the cannabis sector. Up to 85 million viewers will learn how Efixii reduces cannabis cultivator’s compliance costs, and how improved product consistency leads to higher profitability. They also learn how cannabis consumers reliably feedback their consumption experience to cultivators using the Efixii app, and how the Issuer’s technology actually leads to better consumer and patient outcomes.

Shining a light on several important issues and topics currently impacting society, ‘*Advancements*’ covers a vast number of industries and economies, featuring state-of-the-art technologies and solutions dedicated to shaping, molding, and transforming the world. Aiming to create a new level of social awareness, ‘*Advancements*’ brings this vital information to the public in an effort to educate on the effects of such significant contributions.

The Issuer’s full-length feature segment will air Nationwide in the U.S. during a half-hour episode of ‘*Advancements*’ to millions of television households, reaching approximately 200-million subscribers or more via DISH Network, DIRECTV, Verizon FiOS TV, and more than 600 independent rural cable systems. Additionally, the episode is distributed internationally through Voice of America, the official external broadcast institution of the U.S. federal government.

Efixii is licensed to cultivators in a SaaS model and is a free-to-use app for cannabis consumers. Efixii’s cannabis efficacy data is the intellectual property (“IP”) of the Issuer. This IP creates an inherent difficulty in replicating or competing with the Issuer’s cannabis datasets. The Issuer defined their protocols in a provisional U.S. patent application, ‘System of Process and Tracking Cannabis Products and Associated Method Using Blockchain’ filed with the USPTO on December 17, 2020.
