

Form 51-102F3
Material Change Report

Item 1 Name and Address of Company

GOLD'N FUTURES MINERAL CORP. (the “Company”)
Suite 810 - 789 West Pender Street
Vancouver, BC V6C 1H2

Item 2 Date of Material Change

November 23, 2021

Item 3 News Release

The news release was disseminated on November 23, 2021 by way of the facilities of Global Newswire, filed on SEDAR and posted to the Company’s disclosure hall with the CSE.

Item 4 Summary of Material Change

The Company announced it has signed a Memorandum of Understanding (“MOU”) with the three local Anishinaabe First Nations respecting the Hercules Gold Project. The First Nations that are party to the MOU are Animbiigoo Zaagi’igan Anishinaabek (“AZA”), Bingwi Neyaashi Anishinaabek (“BNA”) and Biinjitiwaabik Zaaging Anishinaabek (“BZA”). The Company, AZA, BNA and BZA are collectively referred to as the “Parties”.

The Company also announced the Hercules exploration program and permit update.

Item 5 Full Description of Material Change

On November 23, 2021, the Parties signed an MOU respecting the Hercules Gold Project. As the Hercules project lies within their traditional territories, the First Nations are important stakeholders in Hercules project and its exploration programs.

The MOU sets out a communication protocol between the Parties, establishes a framework for the relationship between the Parties and charts a negotiating path for a pending Exploration Agreement. In addition, the MOU marks the completion of the very important review and approval of Gold’n Futures’ exploration permit, allowing the Ontario Ministry of Northern Development and Mines Natural Resources and Forestry, Mineral Development Branch (NDMNRF) to issue the work permit. The immediate next step will be the commencement of negotiations towards executing the Exploration Agreement between Gold’n Futures and the First Nation communities.

Hercules Exploration Program & Permit Update

GoldSpot Discoveries Corp. (TSXV: SPOT) (OTCQX: SPOFF) (“GoldSpot”) had its geophysical team on the Hercules property starting on October 20th, 2021. During the first two weeks of November, GoldSpot completed its proprietary airborne geophysical surveys utilizing its Multi-Parameter Airborne Survey System (“M-PASS”) with Triaxial Magnetic Gradiometer and Very Low Frequency Electromagnetic (VLF-EM) Platform. The airborne surveys covered

the entire 109 square kilometres of the Hercules property, flying approximately 1,200 line-kilometres with 100-metre line spacing. The Company anticipates GoldSpot will be delivering its preliminary findings of the airborne geophysical surveys in December, 2021. In addition, GoldSpot will use its artificial intelligence algorithms to reinterpret the Hercules property's structural geology, resource geology, and geophysical surveys to put together the highest priority targets for exploration and drilling and, over the coming months, present its recommendations to Gold'n Futures.

On November 18, 2021, the Company received its exploration permit that is effective for a period of three years. With its permit in-hand, Gold'n Futures will commence its inaugural drill program before the end of November 2021 with the area of interest for the drilling occupying an area measuring approximately 2.8 km by 4.6 km, approximately 1,310 hectares ("ha"). The area of interest is centered upon the Hercules historical gold resources and specifically the Golden Mile gold system. The inaugural drill program is budgeted for up to 1,500 metres ("m") comprising ten drill holes. The objective of the first round of drilling will be to target areas for structural and grade continuity beyond the historical resource. The Company expects this first round of drilling to be completed before the December 2021 holidays with resumption of the continuing drill program in mid-January.

Qualified Person

The scientific and technical content of this press release has been prepared, reviewed and approved by Mr. Walter Hanych, P. Geo., who is a Qualified Person under NI 43-101 regulations and is a director of the Company.
