MONTHLY PROGRESS REPORT

Name of Listed Issuer: Argo Gold Inc.

Trading Symbol: ARQ

Number of Outstanding Listed Securities: 63,068,881

Date: August 10, 2021

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

Argo Gold has completed a drilling program at the Uchi Lake Gold Project. A helicopter supported program started in early June and over 2,500 metres of drilling was completed. The program tested the down-dip continuity of high-grade gold results returned from the 2020 channel sampling program as well as test reconnaissance targets along the projected strike of known high-grade mineralization. Initial drilling was completed at Raingold Zone where 2020 channel sampling intersected 2.3 metres (true width) of 31.2 g/t Au.

Argo Gold initiated bedrock stripping, trenching, washing, geological mapping and channel sampling at the Uchi Lake Gold Project in April 2021 and is continuing in phases throughout the 2021 field season. Objectives of the bedrock stripping and trenching are to expand and define known gold mineralization, identify additional gold mineralization along the mineralized trends, and to follow-up on the biogeochemical anomalies identified by the Summer 2019 biogeochemical survey that covered 5 kilometres of strike length on the main mineralized trend. (Argo Gold news release October 28, 2019).

Argo has also completed a LiDAR survey and Aerial Photography at Argo Gold's Uchi Lake Project in the Red Lake District. The data collection by Eagle Mapping covered 23.2 square kilometers consisting of 10 strips with > 50% overlap totaling 65-line kilometers. The data provided by the survey are being used to enhance the base map and assist with planning, access and execution of bedrock stripping, trenching, washing, channel sampling, geological mapping, and drilling. The data is also useful in identifying geophysical structures under canopy allowing for visualization of resistant or recessive lithologies, faults, and veins.
