

Form 51-102F3
Material Change Report

1. Name and Address of Company

Bam Bam Resources Corp. (the “Company”)
700-838 West Hastings Street
Vancouver, British Columbia , V6C 0A6

2. Dates of Material Change(s)

October 13, 2021

3. News Release(s)

News release was issued on October 14, 2021 and disseminated by Newsfile Corp. pursuant to section 7.1 of National Instrument 51–102.

4. Summaries of Material Changes

The Company announces it has engaged Mining Investor Resources Media Ltd., doing business as miningIR.com (“MIR”), to provide the Company with investor marketing services through mining and resource news, lead generation services, social media services, and information company profile page for an initial period of 13 months beginning October 18, 2021, subject to the terms of the service agreement (the “MIR Agreement”) executed between the Company and MIR. Pursuant to the terms of the MIR Agreement, MIR will be paid an aggregate cash amount of \$36,000 for its services.

5. Full Description of Material Changes

News Release dated October 14, 2021– See Schedule “A”.

6. Reliance on subsection 7.1(2) or (3) of National Instrument 51-102

Not applicable.

7. Omitted Information

No information has been omitted.

8. Executive Officer

Mr. David C. Greenway, CEO of the Company, is knowledgeable about the material change contained herein and may be reached at (604) 318-0114.

9. Date of Report

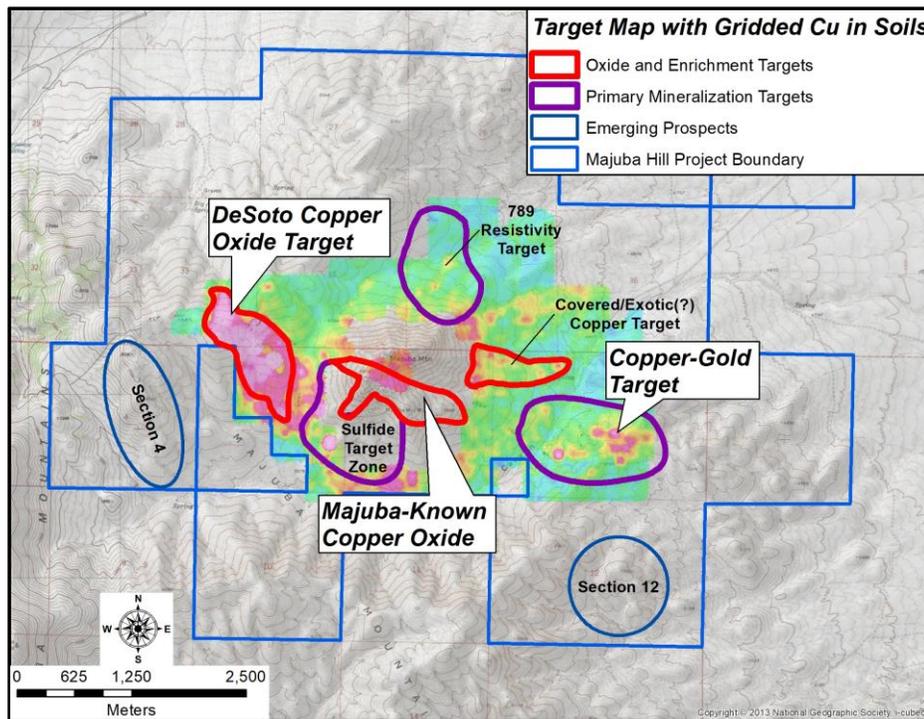

This report is dated October 14, 2021.

SCHEDULE "A"

to the Material Change Report dated October 14, 2021

Bam Bam Announces Copper, Silver, and Gold from Soil Geochemistry Expands Targets at Majuba Hill Porphyry Copper Project in Nevada

VANCOUVER, BC — October 14, 2021 — Bam Bam Resources Corp. (CSE: BBR / OTC: NPEZF / FSE: 4NPB) ("Bam Bam" or the "Company") is pleased to report that recent results from the 2021 soil sampling program are extremely encouraging. 997 soil geochemical samples were collected in 2021 to extend existing copper, silver, and gold anomalies. Two very significant zones of copper/silver/gold were identified at the DeSoto Copper Oxide Target and the newly identified Copper-Gold Target.

A very large, multi-point copper/silver anomaly at the **DeSoto Oxide Target** was extended an additional 274 meters (900 ft) northward. The DeSoto anomalous copper soil zone is outlined using a 100 ppm copper value threshold (see map).

The new **Copper-Gold Target Zone** is over 1,600 meters (5,249 ft) across. Very limited historic underground workings at the Last Chance Mine on the southwest edge of the Target area produced silver, lead, and zinc. Surface rock chip samples from the Copper-Gold Target include:

SAMPLE	Cu (ppm)	Ag (g/t)	Au (g/t)	Zn (ppm)	Pb (ppm)	Sn (ppm)	Mo (ppm)
MHR-1	1,060	188.6	0.111	15,800	33,700	52	12
MHR-2	936	459.4	0.077	83,600	41,100	46	37
MHR-3	129	202.3	0.023	9,200	4,450	21	6
MHR-4	192	497.1	0.027	61,200	12,700	23	48
MHR-5	194	792.0	0.213	8,150	25,600	98	10
MHR-6	26	47.2	0.164	897	273	1	6
MHR-33	38	0.9	0.007	42	18	ND	1
MHR-34	31	14.2	0.006	20	784	0	5
MHR-35	25	5.2	0.021	145	442	ND	1
MHR-36	39	33.0	0.094	179	2,700	ND	39
MHR-37	19	8.4	0.012	38	440	ND	1
MHR-1009	4,630	>1500	0.728	151	2,810	ND	19

Core drilling is planned for the copper-gold target in late October.

The **Covered/Exotic(?) Copper Target** is a completely new target zone emerging from the data. Geologic mapping during 2021 has identified ferricrete zones with iron-oxide cemented colluvial gravels. These zones occur adjacent to topographic ridges and drainages that appear to confine weakly anomalous Cu, Zn, and Fe. Additional surface sampling is planned prior to drill testing. Most of this target is located on private land wholly controlled by Bam Bam with a small portion located on Bam Bam's unpatented lode mining claims.

David Greenway, President and CEO, commented: *"While the step-out and in-fill drilling continues on our Majuba Known Copper Oxide Zone, it is encouraging for the surrounding targets to continue to get larger. During these economic times when new, large copper deposits are rare, I am very pleased to have a project like Majuba expanding so quickly."*

Quality Assurance/Quality Control ("QA/QC") Measures, Chain of Custody

The Company has implemented a QA/QC program using best industry practices at the Majuba Hill Project. The samples are transported from the BBR secure warehouse or directly from the drill to the ALS Sample Prep Facility in Reno or Elko, Nevada. ALS then transports the prepared pulps to their analytical lab in Reno, Nevada or Vancouver, B.C. Soil and rock chip samples are transported by the company directly to Elko or Reno, Nevada.

Drill core samples are sawn in half lengthwise and one half is placed in labeled cloth sample bags. All samples are analyzed for copper, gold, silver, and 33 other elements. Gold is determined by ALS method Au-AA23 which is a fire assay with an AAS finish on a 30 gram split. Copper, silver and the remaining 31 elements are determined by ALS method ME-ICP61 which is a four acid digestion and ICP-AES assay. Approximately 5% of the submitted samples are drill duplicates and copper-gold-porphyry commercial standard reference material pulps. The sample rejects and remaining pulps will be retrieved from ALS.

Qualified Person

The scientific and technical information contained in this news release has been reviewed by E.L. "Buster" Hunsaker III, CPG 8137, a non-independent consulting geologist who is a "Qualified Person" as such term is defined under *National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101")*.

Engagement of Marketing Service Provider

The Company has engaged Mining Investor Resources Media Ltd., doing business as miningIR.com ("**MIR**"), to provide the Company with investor marketing services through mining and resource news, lead generation services, social media services, and information company profile page for an initial period of 13 months beginning October 18, 2021, subject to the terms of the service agreement (the "**MIR Agreement**") executed between the Company and MIR. Pursuant to the terms of the MIR Agreement, MIR will be paid an aggregate cash amount of \$36,000 for its services. Neither MIR nor its affiliates currently own any securities of the Company. MIR and the Company are unrelated and unaffiliated entities.

About Bam Bam Resources Corp.

Bam Bam Resources Corp. (CSE: BBR / OTC: NPEZF / FSE: 4NPB) is engaged in the identification, review and acquisition of latter stage copper and copper/silver/gold assets. This is in direct response to the growing worldwide demand and lack of supply for precious metals fueled by the Green New Deal in the US and most other developed nations with similar programs aimed at addressing climate change. Such programs are heavily reliant on silver, gold and especially copper to produce Electric Vehicles and other renewable power sources, as well as building infrastructure to provide clean and affordable electricity.

The flagship project is the Majuba Hill copper, silver and gold District located 156 miles outside Reno, Nevada, USA. Management has been mandated to focus on safe, mining friendly jurisdictions where government regulations are supportive of mining operations.

Neither the Canadian Securities Exchange nor its Market Regulator (as that term is defined in the policies of the Canadian Securities Exchange) accepts responsibility for the adequacy or accuracy of this release.

On Behalf of the Board of Bam Bam Resources Corp.

"David Greenway"
