LIVE ACQUIRES THE MESA TOP AND SECTION 20 URANIUM VANADIUM AND MOLYBDENUM MINE PROJECTS IN THE COLORADO PLATEAU

Vancouver, British Columbia -- (March 5, 2024) – **Live Energy Minerals Corp.** (CSE: LIVE) (OTC: GTREF) (“**LIVE**” or the “**Company**”) is pleased to announce that it has acquired through staking (pending approval from the Bureau of Land Management (“BML”)) the Mesa Top Mine Property and the Section 20 Mine Property located on BLM land within McKinley County, New Mexico, USA (collectively the “**Properties**”). The Properties cover Jurassic age sediments within the Colorado Plateau and are prospective for Uranium, Vanadium and Molybdenum mineralization.

The claims were staked by the Company’s wholly owned subsidiary, Lithium Valley Holdings Corp. and are pending approval from the BLM. The claims are also subject to a 3% NSR to an arms length party that assisted in identifying and directing the acquisition, which consist of 48 lode mineral claims totalling 960 acres.

The Properties are underlain by sedimentary rocks of the Morrison formation which represent a Jurassic aged depositional environment within the Grants Mineral belt area of the Colorado Plateau. The Colorado Plateau is a geographical area covering large portions of Utah, Colorado, Arizona and New Mexico, it is a region known for its sedimentary hosted Uranium deposits consisting of over 1.2 billion pounds of mined and in situ U₃O₈. A subsequent assessment estimated 4.4 billion pounds of U₃O₈ total endowment in the Jurassic Westwater Canyon Member of the Morrison Formation, which is the main host in the Grants mineral belt (Hall et al., 2023).

QP Statement

Adrian Smith, P.Geo., is a qualified person as defined in National Instrument 43-101 – Standards of Disclosure for Mineral Projects (the “**QP**”) and has reviewed and approved the scientific and technical information contained in this news release.

About LIVE Energy Minerals Corp.

LIVE is a mining exploration company actively engaged in exploring for and identifying new opportunities in clean energy minerals in North and South America. LIVE holds applications for 100% interest in the uranium, vanadium, and molybdenum, Mesa Top and Section 20 Mine projects located in the Colorado Plateau, USA. LIVE also holds, 100% interest in the Skygold project in BC, Canada, and a retained interest in the McDermitt Lithium East Project, Nevada, USA. LIVE is focused on creating value for its shareholders by combining quality project with proven exploration strategies and a team driven to achieve exceptional outcomes.

Forward-Looking Statements

This news release may include "forward-looking information" under applicable Canadian securities legislation. Such forward-looking information reflects management's current beliefs and are based on a number of estimates and/or assumptions made by and information currently available to the Company that, while considered reasonable, are subject to known and unknown risks, uncertainties, and other factors that may cause the actual results and future events to differ materially from those expressed or implied by such forward-looking information. Readers are cautioned that such forward-looking information are neither promises nor guarantees and are subject to known and unknown risks and uncertainties including, but not limited to, general business, economic, competitive, political and social uncertainties, uncertain and volatile equity and capital markets, lack of available capital, actual results of exploration activities, environmental risks, future prices of base and other metals, operating risks, accidents, labour issues, delays in obtaining governmental approvals and permits, and other risks in the mining industry.

The Company is presently an exploration stage company. Exploration is highly speculative in nature, involves many risks, requires substantial expenditures, and may not result in the discovery of mineral deposits that can be mined profitably. Furthermore, the Company currently has no reserves on any of its properties. As a result, there can be no assurance that such forward-looking statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements.
