

Humanoid Global Announces Capital Deployment Strategy Outlook for 2026

– NOT FOR DISSEMINATION IN THE UNITED STATES OR THROUGH U.S. NEWSWIRE SERVICES –

Vancouver, BC – February 25, 2026 – [Humanoid Global Holdings Corp.](#) (“**Humanoid Global**” or the “**Company**”) ([CSE:ROBO](#), [FWB:0XM1](#), [OTCQB:RBOHF](#)), a publicly traded investment issuer focused on building and accelerating a portfolio of pioneering companies in the humanoid robotics and embodied AI sector, is pleased to announce its capital deployment strategy outlook for 2026.

Humanoid Global intends to pursue a strategic acquisition or joint venture as the primary focus of its near-term growth strategy within the humanoid robotics and embodied AI sector. The Company’s objective is to establish and operate a core business within the humanoid robotics value chain, spanning enabling hardware, software, and integrated system capabilities that support the development, deployment, and scaling of embodied AI platforms. Establishing an operating presence in select segments of this value chain is intended to provide Humanoid Global with greater operational control and direct participation as the global humanoid robotics market, currently estimated at approximately US\$ 2–3 billion, is projected to expand to approximately US\$ 200 billion by 2035¹. Any prospective transaction remains subject to completion of due diligence, execution of definitive agreements, and receipt of all required regulatory and exchange approvals.

“Establishing ownership positions that enable Humanoid Global to help shape the development and commercialization of technologies across the humanoid robotics value chain is a core priority as we assemble a portfolio with direct participation in the sector’s long-term growth,” said Shahab Samimi, CEO of Humanoid Global.

Humanoid Global intends to also diversify its portfolio into the Chinese humanoid robotics market as part of its broader global strategy, reflecting China’s position as a leading center for production, deployment, and cost-efficient innovation. In 2025, China accounted for the vast majority of the approximately 13,000 humanoid robots shipped globally, and this early scale advantage is expected to compound over time, with the total number of robots in the country projected to reach approximately 648 million by 2050². Chinese manufacturers are already offering humanoid platforms at materially lower price points than Western counterparts, with entry-level models priced at approximately US\$ 6,000 accelerating adoption across industrial and service applications³.

As part of its long-term capital deployment strategy, Humanoid Global recognizes defence and security as an emerging vertical for humanoid robotics, where embodied AI platforms can augment personnel and critical infrastructure in demanding and hazardous environments. Humanoid robots are poised to reshape labour dynamics in these settings by assuming high-risk tasks and reducing human exposure⁴. By targeting assets and partners developing production-grade systems suitable for such environments, Humanoid Global aims to position its portfolio within this specialized segment as governments expand investment in physical AI to enhance readiness, resilience, and national security.

“China has become a global leader in the scalable and cost-efficient production of humanoid robots, shaping how these systems are priced and adopted worldwide,” said Shahab Samimi, CEO of Humanoid Global.

“At the same time, defence and security are emerging as important application areas for embodied AI, and building exposure across both ecosystems is a key part of our international portfolio strategy.”

About Humanoid Global Holdings Corp.

[Humanoid Global Holdings Corp.](#) (CSE:ROBO, FWB:0XM1, OTCQB:RBOHF) (“Humanoid Global” or the “Company”) is a publicly traded investment issuer building a portfolio of pioneering companies in the growing humanoid robotics and embodied AI sector, investing in and accelerating their growth. It serves as a global investment platform providing liquidity and access to an actively managed portfolio spanning the value chain of this emerging ecosystem, including advanced software, hardware, and enabling technologies. Led by a team with a proven track record of scaling transformative technologies globally, the Company takes a long-term, partnership-oriented approach. It provides capital and strategic consultation on go-to-market strategies, regulatory pathways, and transaction advisory, while facilitating introductions to customers, suppliers, and strategic partners.

Forward-Looking Information

This news release contains statements that may be considered “forward-looking information” within the meaning of applicable Canadian securities legislation. All statements in this release, other than statements of historical fact, are forward-looking statements. In some cases, forward-looking information can be identified by the use of forward-looking terminology such as “plans”, “expects”, “intends”, “anticipates”, “believes”, “assumes”, or variations of such words and phrases or statements that certain actions, events or results “may”, “could”, “would”, “might” or “will”, “occur” or “be achieved”, and similar words or the negative of these terms and similar terminology. Forward-looking information in this release includes, but is not limited to, statements regarding: the completion of a strategic acquisition or formation of a joint venture; diversification of the Company’s portfolio into the Chinese humanoid robotics market; expected benefits of the Company’s investment; and Humanoid Global’s broader investment strategy and objectives.

Forward-looking statements are based on current expectations, estimates, and assumptions made by management in light of its experience and perception of historical trends, current conditions, and expected future developments. Such statements are not guarantees of future performance and involve known and unknown risks, uncertainties, and other factors that may cause actual results, performance, or achievements to differ materially from those expressed or implied in the statements. These factors include, among others, changes in market conditions, business and economic developments, regulatory approvals, availability of financing, and the performance of the Company's portfolio companies. Additional information regarding risks and uncertainties faced by the Company is available under its profile on SEDAR+ (www.sedarplus.ca).

Readers are cautioned not to place undue reliance on forward-looking information. The forward-looking statements contained in this release are made as of the date hereof and are based on information currently available and management's beliefs, expectations, and opinions at that time. Except as required by applicable securities laws, the Company does not undertake any obligation to update or revise such statements, whether as a result of new information, future events, or otherwise.
