

Clear Sky Attracts Accomplished Metallurgical Expert as Lead Technology Advisor

- Former Mining Majors Metallurgist Joins Team -

VANCOUVER, BC, October 28, 2022 (GLOBE NEWSWIRE) -- **Clear Sky Lithium Corp.** (CSE: POWR) (FRA: K4A / WKN: A3DM2W) (OTC: CSKYF) (“**Clear Sky**” or the “**Company**”), a mineral exploration and development company focused on American lithium deposits to support domestic demand, is pleased to announce the appointment of **Turnstone Metallurgical Services (Turnstone), led by Marcus Tomlinson, PhD** to undertake a lead advisory role in the development of lithium extraction and processing technologies.

- PhD specialist bringing over thirty years of experience in metallurgical research, engineering, and operations support
- Experience with Lithium includes USA Rare Earth’s and Texas Mineral Resource Corp.’s Round-Top Project in the United States and supporting Research on battery recycling projects
- Fundamental knowledge in developing patented processes at Goldcorp Inc.

Based in Vancouver, Canada, Marcus Tomlinson brings over thirty years of experience in metallurgical research, engineering, and operations support. For over a decade, he worked in the Corporate Technical Services groups at Goldcorp and Barrick Gold. He founded Turnstone in April 2021 and has subsequently worked on the well-known Texas-based Round Top project in developing a fully integrated flowsheet to support development of this Lithium and rare earth orebody.

Company CEO, Patrick Morris, notes, “Today’s announcement is another milestone event in the development of our venture. Our Company is laser-focused on the development of clean, sustainable extraction and processing solutions for claystone deposits and with this appointment we look forward to transforming our strategic technical ambitions into commercial viability. We welcome Marcus to the team and look forward to building value together.”

Upon Newmont’s acquisition of Goldcorp, Marcus served as Director, Modelling in the Newmont Global Projects team (2020 to 2021). During this period, he supported the expansion project at the world renowned Pueblo Viejo Mine, amongst other large-scale initiatives. At Goldcorp (2012-2020) he served in the corporate technical services team as Director Metallurgy & Research. During this time, he developed a patented process for concentrate enrichment, and supported pre-flotation and pyrite leach projects at the Peñasquito Mine. He also worked on projects to improve leach efficiency and reduce effluent toxicity. He was also involved in development of Goldcorp’s GeoMet strategy to improve predictability of metallurgical performance and financial expectations from projects and operations.

Prior to this, he served as Manager, Metallurgy with Barrick Gold Corporation (2008 to 2012) in the technical services group offering modelling and metallurgical support to global operations and development projects.

Marcus has also worked with a number of major Engineer companies, Worley Parsons Mining & Metals (2007 to 2008) in Australia, AMEC Americas Mining and Metals, Canada (2003 to 2007), Ausenco, Australia (2001 to 2003), AMEC Simons Mining Group, Canada, (1999-2001) and Fluor Daniel Mining & Minerals (1996 to 1999). His career started as a Senior Metallurgist with Anglo American Research Lab (1992 to 1995) in South Africa. He gained Lithium knowledge through Turnstone’s involvement with the Round Top project and battery recycling projects Research.

Forward Looking Information Disclaimer

This news release contains statements and information that, to the extent that they are not historical fact, may constitute “forward-looking information” within the meaning of applicable securities legislation. Forward-looking information may include financial and other projections, as well as statements regarding future plans, objectives, or economic performance, or the assumption underlying any of the foregoing. In some cases, forward-looking statements can be identified by terms such as “may”, “would”, “could”, “will”, “likely”, “except”, “anticipate”, “believe”, “intend”, “plan”, “forecast”, “project”, “estimate”, “outlook”, or the negative thereof or other similar expressions concerning matters that are not historical facts. Examples of such statements include, but are not limited to, statements with respect to the trading of the Company’s common shares on the CSE, global trends towards clean energy, projected growth of demand for lithium and domestic resource production, technological advancements increasing the viability of lithium-ion batteries, the Company’s ability to develop new lithium extraction and processing techniques, the Company’s plan to further strategic exploration on the ELi property, and the Company’s plans to engage key partnerships across relevant fields of academia, as well as industry experts, commercial research and development labs, and end-users to evaluate the highest value clean-tech extraction and processing techniques.

Forward-looking information is based on the assumptions, estimates, analysis, and opinions of management made in light of its experience and its perception of trends, current conditions and expected developments, as well as other factors that management believes to be relevant and reasonable in the circumstances at the date that such statements are made, but which may prove to be incorrect. The material factors and assumptions used to develop the forward-looking information contained in this news release include, but are not limited to, key personnel and qualified employees continuing their involvement with the Company; the Company’s ability to secure additional financing on reasonable terms; the competitive conditions of the sector in which the Company operates; and laws and any amendments thereto applicable to the Company.

Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Company to differ materially from any future

results, performance or achievements expressed or implied by the forward-looking information, including, without limitation, risks relating to the future business plans of the Company; risks that the Company will not be able to retain its key personnel; risks that the Company will not be able to secure financing on reasonable terms or at all, as well as all of the other risks as described in the Company's final long form prospectus dated May 31, 2022, under the heading "Risks Factors." Accordingly, readers should not place undue reliance on any such forward-looking information. Further, any forward-looking information speaks only as of the date on which such statement is made. New factors emerge from time to time, and it is not possible for the Company's management to predict all such factors and to assess in advance the impact of each such factor on the Company's business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking information. The Company does not undertake any obligation to update any forward-looking information to reflect information or events after the date on which it is made or to reflect the occurrence of unanticipated events, except as required by law, including securities laws.

The CSE has neither approved nor disapproved the contents of this press release. Neither the CSE nor its Market Regulator (as that term is defined in the policies of the CSE) accepts responsibility for the adequacy or accuracy of this release.
