

## **Tinley Completes Canadian Production Runs and Provides Corporate Update**

**FOR IMMEDIATE RELEASE**

**THIS NEWS RELEASE IS NOT FOR  
DISSEMINATION IN THE UNITED STATES OR  
TO U.S. PERSONS.**

**LOS ANGELES, California and TORONTO, Canada** – January 26, 2021 – The Tinley Beverage Company Inc. (CSE:TNY, OTC:TNYBF) (“**Tinley’s**” or “**Company**”) is pleased to announce that it has completed production in Canada of both Canadian and US Beckett’s ready to drink and multi-serve products, and that sample production of its Canadian Tinley ’27 drinks is underway this week at its licensed manufacturer in Ontario. The Company is also pleased to provide updates on its corporate and operational activities.

The Canadian versions of the company’s Beckett’s Tonics that have been produced in Ontario, Canada will be available online and in select stores in Alberta and Ontario starting next month. The Company has submitted applications to the AGLC for distribution of the full Beckett’s line-up via Alberta’s liquor channel, in addition to other retail channels including grocery, c-store, and on-premise locations

To leverage its recently-announced marketing partnership with top-rated reality television star Todd Chrisley, the Company is adding sales and distribution representation in Tennessee, where his shows take place, as well as in other states and metro areas where the Chrisley TV properties enjoy their largest audiences. This is in addition to the Company’s recently announced representation in Texas and Louisiana, where Chrisley enjoys a strong following. The Company is also planning in-store appearances and other promotions to drive awareness and sales in these markets.

The Company is also pleased to announce that the first-stage production of its cannabis-infused Tinley’s ’27 products is underway in Canada this week at Peak Processing Solutions. This family of products includes the Canadian version of the Emerald Cup award-winning Coconut Cask. The Company plans to do a scaled test run in late February as the prescribed next step which, subject to lab test results, may be available for sale to the public shortly thereafter. Before the Tinley’s ’27 beverages may be sold in Canada, a 60-day regulatory review period must have elapsed without objection by Health Canada. The 60-day review period for the Tinley’s 27 beverages has commenced and will be completed prior to the end of the February production run, assuming there is no objection from Health Canada. The production of Tinley’s cannabis-infused carbonated products has been delayed, which in management’s view is attributed to Tinley’s other contracted manufacturer not meeting its contractual obligations and deadlines. Tinley is moving forward with its available options to have the carbonated beverages available for sale in Canada as the weather warms. In the meantime, the Company is looking forward to the expected imminent launch of the Tinley’s ’27 beverages, including the ever popular and highly acclaimed Coconut Cask.

The Company’s exclusive distributor for infused products, Great North Distributors, has indicated that several of the provincial cannabis boards across the country have given strong indicative interest in carrying Tinley’s products. The Company is now making formal presentations to these boards to secure purchase orders, and it will update shareholders and other constituents as this process unfolds.

The Company is now in the final stages of solution development with several of its key 12 prospective co-packing clients, and it expects to finalize certain agreements shortly. The Company is expanding its base of equipment and services to serve these clients, including cold storage and new package formats including cans and minis.

Tinley is also pleased to announce that the City of Long Beach, California has deemed the application for the adjacent facility's operation of an Adult-Use Cannabis Distribution facility to be complete. The Company is therefore moving to complete its state licence, required tenant improvements and to schedule municipal inspections. While this distribution licence is not required to deliver co-manufacturing services, it will, upon completion of the aforementioned steps, enable the Company to enjoy new efficiencies for its own brands while offering a valuable additional service to contract manufacturing clients, through its partnership with Mars Distribution.

The Company has amended its incentive stock option plan from a 10% rolling plan to a 15% fixed plan. Following the amendment, the maximum number of common shares issuable pursuant to the exercise of stock options under amended stock option plan (together with all outstanding stock options) will be 18,281,589 common shares, being 15% of the number of issued and outstanding Common Shares as at January 27, 2021.

Tinley is continuing to work with influencers and brand ambassadors to broaden the exposure of the Company, its services and its award-winning infused and non-infused products. The company, together with new ambassadors, will update the public on the company's developments and its ongoing inroads with an ever-expanding base of consumer demographics.

***About The Tinley Beverage Company and Beckett's Tonics California***

Beckett's Tonics California, a wholly owned subsidiary of The Tinley Beverage Company, manufactures and sells the Beckett's Tonics™ and Beckett's '27™ line of liquor-inspired, terpene-infused, non-alcoholic beverages. Beckett's™-non-alcoholic spirits and tonics are available in Costco, Ralphs, BevMo! and other fine retailers, as well as online at Amazon, Walmart.com and at [www.drinkbecketts.com](http://www.drinkbecketts.com). The cannabis-infused versions of the Company's products are available under the Tinley's™ Tonics and Tinley's™ '27 brands in licensed dispensaries and delivery services throughout California. Tinley's cannabis-infused beverages are carefully crafted and bottled at its state-of-the-art 20,000 square foot cannabis beverage manufacturing and co-packing facility in Long Beach, California. The Company is working to launch the full line of its infused and non-infused beverages in Canada.
