

FORM 7

MONTHLY PROGRESS REPORT

Name of Listed Issuer: Pharmadrug Inc. (the "Issuer").

Trading Symbol: BUZZ

Number of Outstanding Listed Securities: 340,816,383

Date: June 30, 2021

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

On June 7, 2021, Pharmadrug Inc. ("Pharmadrug", "We" or the "Company") announced that its Super Smart division has launched a Slim Winkel branded online retail platform in The Netherlands and Europe (see Question #3 for more details).

On June 22, 2021, the Company announced that has initiated preparation of a Pre-Investigational New Drug Application (pre-IND) for its patented enteric-coated formulation of cepharanthine (PD-001), an oral antiviral pill to treat mild-moderate COVID-19.

2. Provide a general overview and discussion of the activities of management.

Pharmadrug is a specialty pharmaceutical company focused on the research, development and commercialization of controlled-substances and natural medicines such as psychedelics, cannabis and naturally-derived approved drugs. The Company owns 80% of Pharmadrug Production GmbH ("Pharmadrug Production"), a German medical cannabis distributor, with a Schedule I European Union narcotics license and German EuGMP certification allowing for the importation and distribution of medical cannabis to pharmacies in Germany and throughout the European Union. The Company also owns 100% of Super Smart, a Dutch company building a modern adult use psychedelic retail business with an elevated and educational focus. Pharmadrug recently acquired Sairiyo Therapeutics ("Sairiyo"), a biotech company that specializes in researching and reformulating established natural medicines with a goal of bringing them through regulatory and research driven clinical trials.

Medical Cannabis:

As Pharmadrug continues to develop its business in Germany, management believes that the Company is on track to achieve significant growth in 2021.

The Company has grown its Bedrocan business, and the number of pharmacies in its distribution network has grown to over 300. However, as Bedrocan's supply is becoming increasingly limited, it has served as an impediment to our growth. Demand currently outstrips supply. The Company believes it already has enough of a distribution network to achieve profitability, but will need to secure more sources to satisfy demand.

In order to address the short-term needs for additional supply, the Company previously decided to secure a second wholesale source of cannabis directly from another Licensed Producer ("LP") for products under their brand. The Company has signed a supply agreement with the German subsidiary of a Canadian-based Global LP. The first shipment was received in the first quarter of 2021 and deliveries to the pharmacy network have already begun. Pharmadrug has also received regulatory approval to distribute THC oil from the same LP. The Company expects to receive first shipments of that oil before the end of the second quarter.

The real opportunity for growth will be the launch of cannabis products under Pharmadrug's own brand. On May 14, 2021, the Company announced the signing of a supply agreement with an emerging Eurozone cannabis extractor for medical grade THC oil to be sold under our own brand. The cannabis extractor recently had its EuGMP inspection from their local regulator with no noted major deficiencies. The Company expects them to receive their certification in this current quarter. Pharmadrug Production has already performed an initial inspection, but will perform a final inspection in June to satisfy the Company's own GMP supply chain requirements. The Company has already finalized the final specs of the product with the extractor and expects to register the product with German authorities in July. Pharmadrug expects initial shipments and sales to begin in September of this year. The Company plans to have a twofold strategy for the Pharmadrug THC oil. Firstly, it will supply local German cannabis wholesalers while also selling directly to the Company's own pharmacy distribution network. Management is also in advanced discussions with an LP from the Iberian Peninsula for white label flower. While Pharmadrug is still working closely with Eve & Co Incorporated, it has experienced delays in receiving the technical data needed to register the specific strains the company wants for the German market.

Pharmadrug is on track to significantly increase its product offering in 2021 by increasing the volume of supply and introducing new lines. By the end of 2021, the Company plans to have three lines of third-party cannabis products as well as both THC oil and flower under its own brand. In order to prepare for the increase in supply, the Company has started to expand its sales force. A new senior sales manager with over 20 years of German pharmaceutical sales experience was hired in April. New sales efforts will also focus on both expanding the direct pharmacy network and establishing relationships with wholesalers as we launch products under our own brand.

Management has also made significant advancements towards launching a CBD line. The Company has received its shipment of initial Pharmadrug

branded CBD oils. As previously mentioned, the company will seek to distribute the product via distributors and e-commerce platforms. With an established supply chain in place and final consumer packaging now finalized, management will be able to test the market out and determine its strategy for CBD oils in Germany and potential other Eurozone countries.

Psychedelics in Europe:

The Company intends to utilize a unique two-prong approach. The first, with Super Smart, will be to capitalize on markets in the Netherlands through the development of an adult-use Smart Shop brand, brick and mortar chain and an online retail platform. Secondly, in Germany and across the Eurozone, the Company will seek to use Pharmadrug GmbH's controlled substance import and distribution license to build a pharmaceutical psychedelics business as jurisdictions in the E.U. legalize psychedelics, and pharmaceutical psychedelics pass through clinical testing. Pharmadrug GmbH recently passed its EuGMP inspection and has secured its certification for another three years. This gives the Company the ability to third-party source narcotics and package them under its own brand.

Super Smart took effective control of its first smart shop on October 1, 2020. The Smart Shop, located in the Town of Tiel in central Netherlands, will serve as an initial platform for Super Smart to build out and refine its new smart shop vision and a springboard to develop its brand and operations.

With the coronavirus ("COVID-19") pandemic lasting much longer than management initially expected, the Company took the decision to pivot from its initial plans and put the development of its brick-and-mortar strategy on hold. In the meantime, the Company decided to develop its brand and business by establishing an online retail strategy under its Slim Winkel brand. Super Smart launched two separate e-commerce platforms. One in Europe and one in the United States. The European Slim Winkel online store will sell psilocybin truffles as well as functional mushrooms in The Netherlands. The website will also service other parts of Europe, but without the access to psilocybin truffles. Launching the online smart shop enabled the company to establish and build its brand with the intention to resume the brick-and-mortar strategy following the end of the pandemic.

Management believes the online strategy will benefit Super Smart in four distinct ways. Firstly, it will help establish the Slim Winkel brand and Super Smart's evolved Smart Shop concept. Secondly, it will enable the company to continue to curate quality products, which will eventually include its own branded psilocybin truffles in The Netherlands. Thirdly, it will enable Super Smart to continue to develop its psilocybin supply chain. Lastly, by introducing the store in other European countries, it will enable Super Smart to capitalize on an already established distribution model and psilocybin supply chain when other European countries legalize. This last point also includes the U.S. Slim Winkel platform.

Super Smart also opened a separate Slim Winkel e-commerce platform in the U.S. that will sell functional mushrooms. Slim Winkel will not only also act as a retail channel but will carry its own branded products. Management has begun to establish its product line and expects to launch in it 2021. The initial focus will continue to remain on functional mushrooms but with the establishment of a strong brand in the US, it can be used for psilocybin truffles as well once their use is approved.

Sairiyo - Biotech Research and Development:

In connection with the Sairiyo Acquisition, the Company has secured an exclusive license from SwRI® to develop and commercialize a novel oral formulation of Cepharanthine for all fields of use as well as exclusive rights to U.S. Patent: 10,576,077, titled “Pharmaceutical Salt forms of Cepharanthine and Tetrandrine”. More recently, the Company has entered into an agreement with SwRI® to initiate non-clinical and clinical manufacturing of Cepharanthine for the Company’s rare cancer and infectious diseases programs. Formalization of the relationship will allow Pharmadrug to expedite development timelines by leveraging SwRI®’s existing Cepharanthine preclinical data sets and considerable manufacturing know-how.

Cepharanthine is a natural product and an approved drug which has been used for more than 70 years in Japan to successfully treat a variety of acute and chronic diseases. In clinical research, Cepharanthine has been shown to exhibit multiple pharmacological properties including anti-oxidative, anti-inflammatory, immuno-regulatory, anti-cancer, anti-viral and anti-parasitic properties. However, historically Cepharanthine’s low oral bioavailability has represented a major obstacle to realizing its full clinical potential.

The Company is focused on advancing the clinical development of an improved oral formulation of Cepharanthine to treat rare cancers and infectious diseases. Compared to generic Cepharanthine, Pharmadrug’s novel formulation has been shown in rodent and non-rodent models to possess markedly superior bioavailability (more easily absorbed). These findings support the development of an orally administered formulation, and in so doing, removes the undesirable requirement for frequent intravenous dosing.

Cepharanthine and Cancer:

Sairiyo is currently focused on advancing the clinical development of Cepharanthine to treat rare cancer diseases. Sairiyo was granted Orphan Drug Designation (“ODD”) from the FDA for Cepharanthine in the treatment of esophageal cancer in January 2021 and has since added some world class experts to its scientific advisory team. Orphan Status from the FDA provides numerous benefits such as tax credits, a more streamlined process and seven years of marketing exclusivity post regulatory approval.

Management decided to conduct some pre-clinical work to evaluate the mechanism of action more fully for Cepharanthine given that the drug displays potential as a direct anti-cancer agent as well a prospect for reducing resistance to common chemotherapies. The first phase of the study will compare

Cepharanthine to the current standard of care in 60 human cancers. The company has already seen preliminary results from approximately 25% of the planned cell lines and several cancers were shown to be impacted by Cepharanthine. The company expects final results from all 60 cell lines by mid to late July and will inform the market of all its findings. The following phase of the program will compare Cepharanthine in conjunction with 3 types of chemo to assess the drug's potential in reducing chemo resistance in cancer cells. The company will then move to initiate an animal study in the fall for Esophageal Cancer as well as any other cancer type that shows comparable potential.

Cepharanthine and Covid-19:

On a separate front, the Company has initiated preparation of a Pre-Investigational New Drug Application (pre-IND) for its patented enteric-coated formulation of cepharanthine (PD-001) as an oral antiviral pill to treat mild-moderate COVID-19. Cepharanthine may work to lessen the effects of coronavirus infection. Cell, animal, and human studies have long reported the immunomodulatory and anti-inflammatory properties of cepharanthine. Cepharanthine has previously been shown to suppress cytokine production and the expression of cyclooxygenase; both of which are crucial to viral replication and inflammatory response. A 2019 study examined the effects of cepharanthine on human lung cells infected with the coronavirus HCoV-OC43. Following pre-treatment with Cepharanthine lung cells showed no virus-induced death. These findings were attributed to the ability of Cepharanthine to inhibit viral RNA replication, block expression of viral proteins, and suppress production of proinflammatory molecules, thus preventing a deleterious exacerbation of cytokine response to the viral infection. Several third party validated library screens of approved and investigational drugs have identified cepharanthine as a forerunner drug candidate in the treatment of COVID-19 based on the superior antiviral properties it holds. Cepharanthine has been shown to be highly effective at blocking cell death following exposure to multiple different coronaviruses, including COVID-19. As such, it is believed that the Company's novel formulation of cepharanthine, PD-001 would be an ideal candidate to evaluate as a potential treatment for mild to moderate COVID-19.

Pharmaceutical Psychedelics Research:

Pharmadrug and Sairiyo had already begun to develop a strategy to commence unique and value adding research in the psychedelic space prior to signing the purchase agreement. Following the acquisition of Sairiyo and its biotech R&D core competencies, Pharmadrug has undertaken efforts to expand its research activities in the pharmaceutical psychedelics space. The Company's psychedelic pharmaceutical strategy will focus specifically on DMT. Through engagement with respected academics and medical/clinical key opinion leaders in the space, management will initiate pivotal preclinical and clinical development activities. Pharmadrug has brought on Dr. Barker, a prominent American DMT academic researcher as an advisor. The Company is collaborating with top-tier academic psychedelic teams on foundational DMT research to be able to build

internal intelligence to serve as the building block at establishing its explicit commercial strategy. The first such relationship was announced in March 2021 with the funding of a foundational study at The University of Michigan on the role of naturally occurring DMT in the brain. The study will examine the potential role of DMT in normal, diseased, and altered states of consciousness in a newly created animal model, with the objective to develop novel therapeutic strategies of DMT for clinical unmet medical needs currently not addressed by DMT. The Company is in talks with other academic institutions as well and hopes to update the market on further collaborations in the short to mid-term.

On April 28 2021, Sairiyo was granted ODD to DMI for prevention of IRI in patients undergoing solid organ transplantation, which includes the liver, kidney, heart and lung. The FDA ODD granted is broader than the Company's original application for kidney transplantation, recognizing the pernicious consequences of IRI in all solid organ transplantation. Before filing an Investigational New Drug application with the FDA to evaluate DMT in human clinical trials, the Company will advance its overall DMT strategy on three separate initiatives. Firstly, Pharmadrug is already at work evaluating specific DMT formulations and delivery technologies aimed at superior delivery and improved efficacy. Secondly, management will contemplate additional pre-clinical research in inflammatory and oxidative stress-induced complications, including organ transplants, to better understand the role DMT plays in the field. Lastly, the Company will broaden its scope to evaluate other rare indications that potentially could benefit from DMT.

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law

The Company currently distributes Bedrocan branded Medical Cannabis to pharmacies in Germany. The company has also recently signed a supply agreement with a Canadian based Global LP to distribute its Medical Cannabis in Germany. The first shipment has been received and sales efforts have begun. Pharmadrug has also recently begun discussions with another producer of cannabis for importation and distribution of its branded THC oils that are produced in Australia.

On the psychedelics side, Pharmadrug had also launched an online retail platform under its Slim Winkel brand in The Netherlands and Europe. The European Slim Winkel online store will sell psilocybin truffles as well as functional mushrooms in The Netherlands. The website will also service other parts of Europe, but without the access to psilocybin truffles. Management believes launching the online smart shop will enable the company to establish and build its brand while the brick-and-mortar strategy was put on hold until the end of the pandemic. The website was launched this morning with a domain name of slimwinkel.nl.

4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.

None noted.

5. Describe any new business relationships entered into between the Issuer, the Issuer's affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship.

On May 14, 2021, the Company entered into the Supply Agreement with an emerging Eurozone cannabis extractor for medical grade THC oil to be sold under Pharmadrug's own brand. The Company expects to receive product and begin selling in Germany by September of 2021. Pursuant to the Supply Agreement, the Company's licensed German distributor, Pharmadrug Production will purchase Pharmadrug branded medical cannabis from the Eurozone cannabis extractor. The cannabis extractor recently had its EuGMP inspection from their local regulator with no noted major deficiencies. The Company expects them to receive their certification in this current quarter. Pharmadrug Production has already performed an initial inspection, but will perform a final inspection June to satisfy the Company's own GMP supply chain requirements. The Company has already finalized the final specs of the product with the extractor and expects to register the product with German authorities in July. Pharmadrug expects initial shipments and sales to begin in September of this year.

6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced.

None noted.

7. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how the consideration was determined and whether the acquisition was from or the disposition was to a Related Person of the Issuer and provide details of the relationship.

None noted.

8. Describe the acquisition of new customers or loss of customers.

None noted.

9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trade-marks.

None noted.

10. Report on any employee hirings, terminations or lay-offs with details of anticipated length of lay-offs.

None noted.

11. Report on any labour disputes and resolutions of those disputes if applicable.

None noted.

12. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings.

None noted.

13. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness.

None noted.

14. Provide details of any securities issued and options or warrants granted.

| Security | Number Issued | Details of Issuance | Use of Proceeds ⁽¹⁾ |
|-----------------|----------------------|----------------------------|---------------------------------------|
| Common shares | 500,000 | Exercise of warrants | \$25,000 |

(1) State aggregate proceeds and intended allocation of proceeds.

15. Provide details of any loans to or by Related Persons.

None noted.

16. Provide details of any changes in directors, officers or committee members.

Note noted.

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

For more information related to certain risks and uncertainties that are inherent to the Company's industry, please refer to the "Risk Factors" section of the Management's Discussion and Analysis filed quarterly on SEDAR.

In addition, on January 30, 2020, the World Health Organization declared that the recent COVID-19 outbreak was a global health emergency, recognizing that the disease represents a risk outside of China, where it emerged in the last couple of months. Companies across various industries could be impacted materially by the coronavirus.

COVID-19's known and unknown impact on earnings, costs, employees, supply chains, customers and other stakeholders, as well as other business matters, may be material for the Issuer, and may have a material impact on the Issuer's gross earnings, net earnings and other business matters. Environmental, social and governance factors may also impact the Issuer's operations in the near future.

Certificate of Compliance

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there is no material information concerning the Issuer which has not been publicly disclosed.
3. The undersigned hereby certifies to the Exchange that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all Exchange Requirements (as defined in CNSX Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.

Dated July 5, 2021.
