About the Company’s Business

Tower One Wireless was founded in 2015 with a mission to own and operate high-quality cellular network infrastructure sites in South American markets that are experiencing strong usage growth.

Tower One Wireless focuses primarily on building towers in municipalities where there is limited or no cellular coverage or capacity. This enhances the probability of multiple carriers sharing the tower and minimizes competitive risk. Tower One Wireless has assembled a decorated management team with top-tier cellular development experience with one of South America's largest tower developers. Tower One Wireless is currently focused on 4G and 5G LTE infrastructure expansion in Colombia and will look to open other territories.
