FORM 7

MONTHLY PROGRESS REPORT

Name of Listed Issuer: **Snowline Gold Corp.** (the "Issuer").

Trading Symbol: **CSE:SGD**

Number of Outstanding Listed Securities: **132,150,993**

Date**:** **for the month ending January 31, 2023**

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

(a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.

(b) The term "Issuer" includes the Issuer and any of its subsidiaries.

(c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

   On January 18, 2023 the Issuer announced additional preliminary assay results from its 2022 drilling program at the Valley Zone, Rogue Project,

Yukon, and the commencement of metallurgical testing. Holes V-22-026 and V-22-027, drilled to the southeast of previously announced holes V-22-014 (285.2 m @ 1.45 g/t Au) and V-22-007 (410.0 m @ 1.89 g/t Au), extend the strike length of the near-surface, well-mineralized corridor at Valley by 172 m to at least 550 m (open). V-22-027 returned the longest mineralized intersection seen at Valley to date, with potential for higher grades immediately above this hole based on nearby results. Assays remain pending for 6,003 m of the 2022 Rogue drill program.

- Hole V-22-026 returned 1.25 g/t Au over 189.2 m from surface within a broader mineralized interval averaging 0.90 g/t Au over 289.7 m in 170 m step-out
- Hole V-22-027 returned 1.01 g/t Au over 250.0 m, within a broader mineralized interval averaging 0.69 g/t Au over 481.5 m
- Results extend strike length of the mineralized core of the Valley intrusion to southeast, adding significant tonnage to known mineralization
- Metallurgical testing of Valley drill core set to advance understanding of gold recovery and project economics
- Assays still pending for 13 of 32 holes (6,003 m of 13,320 m) drilled at Valley and Gracie in 2022

"Each round of Valley drill results has increased not just to the known extent of mineralization at the target, but to our understanding of its geology and the geometry of its highest-grade zones," said Scott Berdahl, CEO & Director of Snowline. "The most robust and consistent mineralization we have seen so far at Valley begins in a broad zone at surface, lending itself to promising potential economics for the project, and reducing the drill metres required to advance the discovery. We eagerly await remaining 2022 drill assay results that will shed additional light on this substantial gold discovery. Our current metallurgical program will provide additional value in outlining gold recoverability, an important milestone as the project moves forward."
