

Digital Commodities Realizes 320% Gain on Gold Finder Investment - Strengthens Position in Commodity and Digital Markets

Vancouver, British Columbia--(Newsfile Corp. - October 24, 2025) - Digital Commodities Inc. (CSE: DIGI) (OTCQB: DGCMF) (FSE: W040) ("Digital Commodities" or the "Company"), an investment company focused on bitcoin, gold, and selective investments in public and private companies, is pleased to announce a successful monetization within its commodities portfolio and continued strength across its core holdings.

The Company has sold 5,000,000 shares of Gold Finder Resources (TSXV: GLD) at an average price of \$0.106, for gross proceeds of \$530,000, representing a 320% gain from its acquisition cost of \$0.025 per share. Digital Commodities continues to hold 5,000,000 additional shares and 10,000,000 warrants exercisable at \$0.05, providing further exposure to the company's ongoing progress and potential future value creation.

In addition, the Company's 6,500 units of Sprott Physical Gold Trust (TSX: PHYS), acquired earlier this year, have appreciated meaningfully in line with the recent surge in gold prices, which reached new all-time highs this quarter. This performance highlights the Company's strategic alignment between traditional and digital commodities as part of its broader asset diversification approach.

With strong cash reserves, no debt, and a disciplined capital allocation framework, Digital Commodities remains well positioned to identify and pursue accretive equity and asset opportunities across both physical and digital commodity sectors. The Company is actively evaluating blockchain-enabled and tokenized commodity platforms that broaden access to digital representations of tangible assets, such as gold and energy.

"Our success with Gold Finder Resources reflects both our timing and our patience," said Brayden Sutton, Chief Executive Officer of Digital Commodities. "We remain committed to creating long-term value for our shareholders through selective exposure to both traditional and digital commodity assets."

About Digital Commodities Inc.

Digital Commodities is a public investment issuer focused on bitcoin, gold, and other hard-asset-backed opportunities across the commodities and digital sectors. The Company's mission is to build and actively manage a transparent and durable portfolio anchored in sound money principles and long-term value creation.

Forward-Looking Statements

This release includes certain statements and information that may constitute forward-looking information within the meaning of applicable Canadian securities laws. Forward-looking statements

relate to future events or future performance and reflect the expectations or beliefs of management of the Company regarding future events. Generally, forward-looking statements and information can be identified by the use of forward-looking terminology such as "intends" or "anticipates", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "should", "would" or "occur". This information and these statements, referred to herein as "forward-looking statements", are not historical facts, are made as of the date of this news release and include without limitation, that Digital Commodities remains well positioned to identify and pursue accretive equity and asset opportunities across both physical and digital commodity sectors; that the Company is actively evaluating blockchain-enabled and tokenized commodity platforms that broaden access to digital representations of tangible assets, such as gold and energy; that the Company is committed to creating long-term value for its shareholders through selective exposure to both traditional and digital commodity assets and statements relating to Digital Commodities exposure to the Gold Finder Resources' ongoing progress and potential future value creation.

In making the forward-looking statements in this news release, the Company has applied certain material assumptions, including without limitation, that the Company will be successful in pursuing accretive equity and asset opportunities across both physical and digital commodity sectors; that the Company will carry on with its plans to actively evaluate blockchain-enabled and tokenized commodity platforms; that the Company will be successful in creating long-term value for its shareholders through selective exposure to both traditional and digital commodity assets; that the Company will benefit and derive value from Gold Finder Resources' progress; the Company's business plans will remain unchanged; and management's expectations regarding the gold and digital asset market will prove to be accurate.

These forward-looking statements involve numerous risks and uncertainties, and actual results might differ materially from results suggested in any forward-looking statements. These risks and uncertainties include, among other things, that the Company will fail to pursue accretive equity and asset opportunities across both physical and digital commodity sectors; that the Company will fail to carry on with its plans to actively evaluate blockchain-enabled and tokenized commodity platforms; that the Company will fail to create long-term value for its shareholders through selective exposure to both traditional and digital commodity assets; that the Company not derive additional value from its Gold Finder Resources' investment; adverse changes to the gold or digital commodity markets; a drop in gold prices; management's expectations regarding the gold and digital asset market will prove to be inaccurate; and other risks detailed herein and from time to time in the filings made by the Company with securities regulators. Accordingly, readers should not place undue reliance on the forward-looking statements and information contained in this news release. Readers are cautioned that the foregoing list of factors is not exhaustive. Although management of the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements or forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements and forward-looking information. Readers are cautioned that reliance on such information may not be appropriate for other purposes. The Company does not undertake to update any forward-looking statement, forward-looking information or financial outlook that are incorporated by reference herein, except in accordance with applicable securities laws.

Neither the CSE nor its Regulation Services Provider (as that term is defined in the policies of the CSE) accepts responsibility for the adequacy or accuracy of this release.
