

Intellabridge Technology Corporation Announces Kash Accounts Open to Customers in the United States

Menlo Park, California and Vancouver, British Columbia -- (Newsfile Corp. – March 31, 2022) - Intellabridge Technology Corporation (“Intellabridge”) is pleased to announce today the official launch of Kash USD Accounts in the United States, which gives customers FDIC insured USD accounts and the ability to on-ramp from US Dollars into decentralized finance (DeFi) to earn a 10% stable interest rate on their Kash savings accounts. Customer deposits made before July 1st, 2022, will be locked into the highest-tier variable earnings rate up to 20%.

In recent years, savers have had few reasonable options to safely store their wealth, with the average savings account interest rate in the United States in October 2021 at 0.06%, according to Bankrate’s [survey of institutions](#). With the U.S. [consumer price index surging](#) to 7.9% in February from a year ago, the highest rate in over 40 years, the result is a loss of purchasing power and deterioration of overall wealth for the American consumer.

“However, with the launch of Kash in the United States, we are realizing a paradigm shift for not just DeFi and our company, but the entire banking industry,” said John Eagleton, CEO at Intellabridge. “With our product, Intellabridge has become the first publicly traded decentralized finance company with a working product empowering individual users with an alternative to traditional banking. Leveraging blockchain technology with self-custodial accounts, Kash enables access to high-earnings DeFi money markets. We truly empower individual users to participate in decentralized financial markets with an easy user interface, integration with [Prime Trust](#) DeFi on ramp, and connectivity to over 11,000 banks across the United States via [Plaid](#). We will continue to enhance the value of our product offering with a Mastercard debit card program in Q2 2022 and a goal to provide our customers with a full suite of traditional banking services on our mission to building better banking on the blockchain.”

Intellabridge made the decision to approve this release after a successful beta period in March. Customers now have the ability to deposit and withdraw funds with thousands of banks and credit unions via pull ACH with Plaid, push ACH, or wire transfer, and seamlessly access high-yield earnings accounts. All Kash customers have a bank account number, routing ABA number, bank address, and depository bank name associated with their account.

To sign up for a Kash account, please visit <https://www.kash.io/>.

About Intellabridge Technology Corporation

Intellabridge Technology Corporation (CSE: KASH) (OTCQB: KASHF) (FSE: KASH.F) is a digital banking solution based on blockchain technologies that provides retail and institutional investors with access to decentralized financial applications with additional layers of cybersecurity and customer service.
