Since July of 2020 the price of gold has traded near or above its 10-year high of US \$1,770 per troy ounce established in October of 2012. This prolonged period (+19 months) of a strong gold price has generated a sustained interest in the sector. Gold closed out February at just above \$1,900. The outlook for a continuing

strong gold price remains positive which is expected to sustain interest in the sector.

The geopolitical stability decreased substantially at the end of the period with the invasion of Ukraine by Russian forces. There is no direct impact to Getchell's operations or assets, however additional overall market and financing risks, and potential impacts deriving from said risks must be considered due to the conflict.

The market for exploration companies can prove challenging in terms of raising sufficient capital to fund exploration activities. There is no guarantee that fundraising efforts will be successful on a continuing basis.

The Issuer's near-term strategy to advance its assets is not currently being impacted by the remaining COVID-19 travel and quarantine restrictions. The relaxation of quarantine requirements on individuals returning to Canada has greatly improved the travel flexibility of the Company's geologic team. The Issuer continues to monitor the situation and is in compliance with all government guidelines.
