

Golden Independence Announces M&I Resource of 537,300 Gold Ounces and Inferred Resource of 943,500 Gold Ounces at the Independence Project

Vancouver, British Columbia--(Newsfile Corp. - May 19, 2021) - Golden Independence Mining Corp. (CSE: IGLD) (OTCQB: GIDMF) (FSE: 6NN) ("Golden Independence") or (the "Company") is pleased to announce its maiden National Instrument 43-101 (NI 43-101) compliant Mineral Resource Estimate ("MRE") for the Company's flagship Independence project located adjacent to Nevada Gold Mines' Phoenix-Fortitude mining operations in the Battle Mountain-Cortez trend of Nevada.

The MRE incorporates over 125,000 feet of RC and core drilling in 234 holes, outlining both a near surface and an underground resource. The Company is actively advancing the near surface portion of the MRE towards a Preliminary Economic Assessment anticipated by year-end 2021. Highlights of the MRE include:

- **Near Surface Resource:** Measured & Indicated Total Resource of 537,300 ounces of gold and 8.1 million ounces of silver plus an Inferred Total Resource of 147,300 ounces of gold and 1.2 million ounces of silver.
- **Underground Resource:** Inferred Resource of 796,200 ounces of gold.

"We are very pleased with the maiden NI 43-101 compliant resource for our Independence property which totals 537,300 gold ounces in M&I plus 943,500 gold ounces in Inferred with a substantial silver credit," commented Christos Doulis, CEO. "This MRE, the near surface component of which will provide the foundation for a Preliminary Economic Assessment anticipated later this year, represents the first step in a transformational year for the Company as we rapidly advance the Independence project towards a production decision. In addition, our current drill program is focused on delineating additional near-surface mineralized material, including in the area of the recent high grade near surface discovery reported in hole AGEI-32, for a future resource update," he concluded.

The Company commenced an 8,000-foot reverse circulation (RC) drill program in late April focused on expanding the near-surface high-grade oxide mineralization encountered in hole AGEI-32 ([see news release dated March 16, 2021](#)) and in delineating additional resources in the relatively sparsely drilled northern portion of the Independence project.

The resource estimate was completed by James Ashton of Dyer Engineering with an effective date of May 17, 2021 and complies with National Instrument 43-101 and guidelines developed in 2014 by the Canadian Institute of Mining and Metallurgy ("CIM"). In accordance with NI 43-101, a Technical Report will be filed on SEDAR within 45-days of this release.

Table 1: Independence Project - Mineral Resource Estimate

Independence Near Surface Mineralization							
Measured Resources							
Cutoff (gr. Au/tonne)	Tonnes	Grade (g/t)			Ounces	Ounces	Ounces
		Gold	Silver	Gold Eq.	Gold	Silver	Gold Eq.
0.2	7,519,000	0.50	9.80	0.64	119,900	2,369,600	153,800
Indicated Resources							

Cutoff (gr. Au/tonne)	Tonnes	Grade (g/t)			Ounces	Ounces	Ounces
		Gold	Silver	Gold Eq.	Gold	Silver	Gold Eq.
0.2	32,133,000	0.40	5.59	0.48	417,400	5,775,700	499,000
Measured & Indicated Resources							
Cutoff (gr. Au/tonne)	Tonnes	Grade (g/t)			Ounces	Ounces	Ounces
		Gold	Silver	Gold Eq.	Gold	Silver	Gold Eq.
0.2	39,652,000	0.42	6.39	0.51	537,300	8,145,300	652,800
Inferred Resources							
Cutoff (gr. Au/tonne)	Tonnes	Grade (g/t)			Ounces	Ounces	Ounces
		Gold	Silver	Gold Eq.	Gold	Silver	Gold Eq.
0.2	14,449,000	0.32	2.62	0.36	147,300	1,219,100	164,900
Independence Underground Mineralization							
Inferred Resources							
Cutoff (gr. Au/tonne)	Tonnes	Grade (g/t)			Ounces	Ounces	Ounces
		Gold	Silver	Gold Eq.	Gold	Silver	Gold Eq.
TBD	3,794,000	6.53	0.000	6.53	796,200	0	796,200

Notes to Mineral Resource Estimate:

1. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, sociopolitical, marketing, changes in global gold markets or other relevant issues. The CIM definitions (2014) were followed for classification of Mineral Resources. The quantity and grade of reported inferred Mineral Resources in this estimation are uncertain in nature and there has been insufficient exploration to define these inferred Mineral Resources as an indicated Mineral Resource. It is probable that further exploration drilling will result in upgrading them to an indicated or measured Mineral Resource category.
2. The Mineral Resource Estimate incorporates over 125,000 feet of reverse circulation and core drilling in 234 holes, and outlines both a near surface and an underground resource. The near surface mineralization is primarily based on the reverse circulation drilling, while the underground mineralization is based entirely on core drilling.
3. The resource was prepared by James Ashton, P.E., an independent QP, with an effective date of May 17, 2021.
4. The mineral resources are unconstrained and presented at an undiluted 0.20 g/t gold cut-off grade which represents mineralization that is potentially available for open-pit mining and heap-leach processing. There are sulfides present at depth in the near surface mineralization. The Company is undertaking metallurgical studies to define the redox boundary.
5. Underground mineralization resources were quantified based on deep tabular solids representing potentially underground mineable lenses.
6. Gold equivalent values are based on a silver to gold ratio of 70:1

Qualified Person

The technical content of this news release has been reviewed and approved by R. Tim Henneberry, PGeo (B.C.), a director and president of Golden Independence Mining and a qualified person under National Instrument 43-101.

About Golden Independence Mining Corp.

Golden Independence Mining Corp. is an exploration company currently focused on exploring the advanced-stage Independence property located adjacent to Nevada Gold Mine's Phoenix-Fortitude mine in the Battle Mountain-Cortez Trend of Nevada. The Independence property hosts a M&I resource of 537,300 ounces of gold and Inferred resource of 943,500 ounces of gold with a substantial silver credit. The Company is actively advancing the near-surface resource towards a production decision with a PEA anticipated in late 2021.
