Report on Business

1. General Overview:

Voyageur Mineral Explorers Corp. (the "Company" or "Voyageur") is a Canadian junior mineral exploration company with a specific focus on mineral properties in Northwest Manitoba and Northeast Saskatchewan, Canada. All of the Company's properties are currently at the exploration stage. The Company has assembled a portfolio of base and precious metal prospects, including strategic locations in both Manitoba and Saskatchewan. The Company also owns a portfolio of royalties on several properties in the Flin Flon camp including one on the McIlvenna deposit owned by Foran Mining that it at the PFS level.

On September 28, 2020, the Company announced that it will extend the expiry date by one year of a total of 3,584,500 common share purchase warrants (collectively, the "**Warrants**") which were issued pursuant to certain private placements of the Company which closed on December 31, 2018, October 8, 2019 and October 18, 2019, respectively. The terms of the Warrants are as follows:

<u>Issue Date</u>	<u>Number of Warrants</u>	<u>Exercise Price</u>	<u>Original Expiry Date</u>	<u>New Expiry Date</u>
Dec 31, 2018	84,500	\$0.35 per share	Dec 31, 2020	Dec 31, 2021
Oct 8, 2019	1,675,000	\$0.35 per share	Oct 7, 2020	Oct 7, 2021
Oct 18, 2019	1,825,000	\$0.35 per share	Oct 17, 2020	Oct 17, 2021

All other terms of the Warrants remain the same.

2. Management Activities: Report writing and compilations.

3. New exploration started or completed; properties acquired:

No new exploration was started or properties acquired.

During August the Exploration team worked on completing drill reports, reviewed geophysical surveys for accuracy, completeness and recommendations. Management sought clarification on both down hole electromagnetic and surface surveys for future target development. Worked on alteration and

whole rock classification of samples collected from drilling. Reviewed Voyageur's large property package for the purpose of upcoming drill and geophysical programs. Management sought out and executed contracts to carry out compilations for property data sets, much of it pre digital, to plan programs and development of targets for drilling. Continued review and prioritization of which properties and commodities to focus on in consideration of the present market and the opportunities that this market presents for growth. Two assessment reports on the West Big Island Drilling and the Aimee Lake Drilling carried out this past winter were filed for assessment. Additional grab samples from old trenches were collected from the Evan Lake property which was unavailable last year for sampling due to high water levels. The property located in the Norway House Band's Traditional Land was unavailable for sampling by Company contractors due to travel restrictions but were made available by prospectors who owned the claims. The samples have been sent to TSL Laboratories in Saskatoon for analyses for gold, silver, copper and nickel as well as other trace elements. The samples were gossanous with abundant pyrite and some pyrrhotite and trace chalcopyrite along shear fractures..

In July and August, external consultants conducted a preliminary desktop review of the 2020 drilling results and previous geological data on all properties. As a result, four specific project areas have been targeted for detailed data compilation and field visits. Field visits and drill core reviews were conducted in September at 1) the Tara prospect within the Big Island East property, 2) the Leo Lake-Amulet property, 3) the Albert's Lake Gold property and 4) the Mink Narrows property. Representative samples, 41 in total, of bedrock were collected in all areas for multi-element litho-geochemical analyses at Activation Laboratories. The geochemical data are expected in October and will be used to characterize the prospectivity of each area by comparing to available data from the Flin Flon copper-zinc-gold deposit host rocks. A field report will also be completed in October. A plan has been initiated with Axiom Geoscience Services to conduct borehole geophysical surveys at the Tara prospect to generate new targets for drilling.

- 4. Exploration changes and terminations: N/A**
- 5. New Contracts and/or Joint Ventures entered into: N/A**
- 6. Contract Expirations/terminations: N/A**
- 7. Acquisitions or dispositions: N/A**
- 8. Describe the acquisition of new customers or loss of customers: N/A**
- 9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trade-marks:**
- 10. New hires, and layoffs: None**
- 11. Labour disputes in progress and resolution of same: None**
- 12. Litigation: No legal proceedings have been filed against the Issuer**
- 13. Indebtedness incurred or repaid: As of the end of August, Voyageur had no long-term debt**

14. Provide details of any securities issued and options or warrants granted.

Security	Number Issued	Details of Issuance	Use of Proceeds ⁽¹⁾

15. Loans to Related Persons: Nil

16. Committee Changes, Directorship changes: On September 17, 2020, the Company announced that Messrs. Ross Orr and Fraser Laschinger were appointed to the Board of Directors and that Messrs. William Jackson and Warren Bates resigned from the Board of Directors.

17. Market Matters: Market conditions for gold and copper is improving.

Certificate of Compliance:

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there were no material information concerning the Issuer which has not been publicly disclosed.
3. The undersigned hereby certifies to CSE that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all CSE Requirements (as defined in CNSX Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.
