

Intellabridge Technology Corporation Launches Kash Beta Version 1.1

Menlo Park, California, Vancouver, British Columbia, and Boulder, Colorado -- (Newsfile Corp. - September 2, 2021) — Intellabridge Technology Corporation (“Intellabridge”) is pleased to announce the launch of Kash Beta Version 1.1 which includes Ethereum wallets and an integration with Metamask, one of the top wallets with more than 10 million monthly active users, as part of a major industry initiative bridging the Ethereum and Terra blockchains.

Providing customers with Ethereum wallets, and Metamask integration, opens up the Kash application to the largest DeFi ecosystem, and marks an important step forward for Intellabridge’s strategy as the gateway to decentralized finance. Intellabridge expects its new gateway to make decentralized finance accessible to users globally. By combining its global presence with Terraform Lab’s technology stack and the Ethereum ecosystem, Intellabridge hopes to unify multiple pathways to decentralized finance and support the platform with customer service, third-party insurance options, cutting-edge security, and compliance and regulatory oversight as a public company.

“This is the beginning of a broader Ethereum integration designed to open the Kash platform to new customers on the Ethereum blockchain,” said John Eagleton, CEO of Intellabridge. “Our goal is to give potential customers in the Ethereum ecosystem an easy way to access the benefits of the Terra ecosystem.”

To sign up for Kash [visit the beta site here](#).

Intellabridge will also be hosting its public monthly AMA session on Monday September 6th 2021 at 9 am PST on Clubhouse and Discord for customers and investors to ask questions and learn more about Kash and Intellabridge.
