

FORM 7

MONTHLY PROGRESS REPORT

Name of Listed Issuer: **APIA ENERGY CORP.** (the "Issuer").

Trading Symbol: "**API**"

Number of Outstanding Listed Securities: **58,402,007 common shares**

Date: **August 2, 2018**

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact. **At Alces Lake, northern Saskatchewan, a seven man crew is on site to follow up the discovery of high grade critical Rare Earth Elements ("REEs") as well as near surface uranium oxide. On August 2, 2018 the Company announced that it has uncovered surface mineralization in nine separate zones with high levels of radioactivity and highly anomalous, visible concentrations of monazite. Overburden stripping and trenching are**

in progress in six zones with most zones open in all directions. An excavator is in operation to speed up the progress. A high pressure water pump is being used to wash outcrops of remaining overburden sedimentary cover.

In the Charles zone, 223 samples from channel sample intervals were taken and have been delivered to the Saskatchewan Research Council's Geoanalytical Laboratories, with results expected in two to four weeks. An outcrop sample taken from the Charles zone in 2011 returned 16.1 wt% Total Rare Earth Elements. Diamond drilling to test for REE mineralization at depth is scheduled to start shortly.

All permits required for the exploration work and diamond drilling are in hand. A semi-permanent camp has been built at Alces Lake.

2. Provide a general overview and discussion of the activities of management. **Management focussed on building the camp and planning and purchasing equipment and supplies for the field work and diamond drilling at Alces Lake, which could extend to October.**
3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law. **See paragraph 1 above.**
4. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned. **The Saskatchewan holdings total 51,164 hectares, (126,430 acres), with other extensive holdings in Ontario at Elliot Lake. Exploration effort is currently concentrated on the Alces Lake Property.**
5. Describe any new business relationships entered into between the Issuer, the Issuer's affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship. **N/A**
6. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced. **N/A**
7. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how the consideration was determined and whether the acquisition was from or the disposition was to a Related Person of the Issuer and provide details of the relationship. **N/A**
8. Describe the acquisition of new customers or loss of customers. **N/A**

9. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trade-marks. **N/A**
10. Report on any employee hirings, terminations or lay-offs with details of anticipated length of lay-offs. **N/A**
11. Report on any labour disputes and resolutions of those disputes if applicable. **N/A**
12. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings. **N/A**
13. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness. **N/A**
14. Provide details of any securities issued and options or warrants granted. **On July 23, 2018 the Company completed a non-brokered private placement of 910,000 flow-through units at \$0.19 and 5,160,000 working capital units at \$0.17 for aggregate proceeds of \$1,050,100. Warrants for 5,615,000 shares exercisable at \$0.30 for eighteen months were issued as part of the units. There is a “Trigger Date” for the exercise of the warrants if the stock trades over \$0.45 for a set period of time.**
15. Provide details of any loans to or by Related Persons. **Undrawn management fees owing to the CEO totals \$576,730 at July 31, 2018.**
16. Provide details of any changes in directors, officers or committee members. **N/A**
17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer’s market(s) or political/regulatory trends. **The results of exploration programs as well as the outlook for world uranium and REE production and market prices affect the stock market price of the Company’s shares.**

Financings completed in the past year enable the planned exploration work to be done on the Saskatchewan properties in 2018, with limitations on timing, as some sites can only be accessed and drilled when ground conditions permit.

The results from the 2017 ground prospecting on the Alces Lake property indicated some of the highest-grade REE mineralization in the world, hosted within five surface showings that remain open in all directions. This year the number of zones uncovered increased to nine. Overburden stripping, trenching and diamond drilling will continue, with the expectation of completing a NI 43-101 compliant inferred resource estimate by year-end. Prices for critical REEs have increased significantly in the past year.

The economic value of the Company’s NI 43-101 reported resources at Elliot Lake is dependent, among other factors, on the market price and the demand outlook for uranium and REEs, as these can be mined together in one underground mining operation. REE supply from China tightened in 2017

due to environmental controls and stockpiling in light of demand growth and to avoid price spikes, with a foreseeable imbalance from production.

Spot uranium prices remain around US\$23 per lb. Production cutbacks by Cameco and Kazatomprom, the largest uranium producer in Kazakhstan, (largely selling at spot prices) are expected to bring the new supply and demand closer to balanced. Kazatomprom increased its production cuts to 20% in 2018, expected for a period of three years. Cameco is using excess inventory to supply its contractual delivery commitments, as the cost of mining far exceeds the spot price.

The uranium demand forecast is not expected to increase in the near future, but by 2021 known supply sources are projected to be unable to match demand. Industry opinion is that a long-term contract price of US\$60 is needed before any new mining project will advance.

Reactor operators have adopted a wait-and-see attitude on price and are not building their stockpiles to “normal” levels. China has 20 new nuclear units under construction to reduce the use of coal, which is currently used to supply 70% of its electricity, and has an ongoing program of closing coal mines.

64 reactors are reported to be under construction around the world. The eighth of 39 operable reactors in Japan resumed operation in May. Another 17 have applied to restart.

The political stability of countries currently supplying the REE and uranium market has caused concern in the United States, as very little uranium for reactors is sourced domestically, with a similar situation for the supply of critical REEs required by the defence industry and for electronics. Washington has decreed that the critical REE for the manufacture of permanent magnets must not be sourced from China.

In response to US sanctions, Russia has threatened to halt enriched uranium exports to the US. Russia provides 14% of the US requirement, but Kazakhstan and Uzbekistan provide 24% and 4% respectively. The threat has had no effect on the quoted spot price.

Certificate Of Compliance:

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there were is no material information concerning the Issuer which has not been publicly disclosed.

3. The undersigned hereby certifies to the Exchange that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all Exchange Requirements (as defined in CNSX Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.

Dated: **August 2, 2018.**
