**NEWS RELEASE**

**ARCTURUS TO ACQUIRE 15-ACRES OF CANNABIS ZONED LAND**

November 15, 2016 – Vancouver, British Columbia – Arcturus Growthstar Technologies Inc. (the “Company” or “Arcturus”) (CSE: AGS) (OTCQB: AGSTF) is pleased to announce that it has signed a Letter of Intent (“LOI”) to acquire a 15-acre parcel of land in Redland, Florida, in a county that is designated to legally cultivate, process and dispense cannabis. Redland is an unincorporated community within Miami-Dade County, with Biscayne National Park to the east and Everglades National Park to the west. Redland is primarily a Miami suburb and a major agricultural area. Miami-Dade County is referred to as the nation’s “Salad Bowl” and “Winter Bread Basket.”

“We are pleased to have reached this LOI to acquire this prime parcel of land as it has a long history as a plant nursery, which was first established in 1963,” says Mr. William Gildea, Arcturus Growthstar Technologies Inc.’s CEO and Chairman. “This acquisition will be an all-stock deal and greatly adds to our geographic footprint and overall strategy in the state of Florida. With the recent passage of Amendment 2, an initiative which significantly broadens Florida’s medical marijuana program, we want to be firmly established in the state and solidify our first mover advantage in one of the biggest potential cannabis markets in the United States.”

With this acquisition and the previously announced 10-acre greenhouse acquisition near Orlando, Arcturus has the potential, if fully licensed, to develop 25-acres of cannabis crops. If current state projections for the cannabis market size hold up to their \$1.8B projection by 2020, Florida will have considerable demand for medical marijuana, even without factoring in the potential for recreational legislation.

This is an exciting acquisition for Arcturus as the 15-acre farm is located in a designated legal grow zone with close proximity to Miami. Arcturus and its experienced team of operators, including John Sweeney, former VP of Operations for Tilray’s 60,000-square foot Vancouver facility, is in a unique position as a Canadian based company because it is poised to quickly commence operations within the United States rather than potentially wait years to become a licensed producer under Canadian law.

For further information, contact William Gildea, Director, at 617.834.9467.

On behalf of the Board,

**Arcturus Growthstar Technologies Inc.**

William Gildea, CEO & Chairman

## About Arcturus

The Company's business model includes developing and acquiring technologies that will position it as a leader in the evolution of Controlled Environment Agriculture (CEA) for the global production of various types of plants. Arcturus provides scalable, indoor CEA systems that utilize minimal land, water and energy regardless of climate, location or time of year and are customized to grow an abundance of crops close to consumers, therefore minimizing food miles and its impact to the environment. The Company holds an exclusive, worldwide license to use a patented vertical farming technology that, when compared to traditional plant production methods, generate yields up to 10 times greater per square foot of land. The contained system provides many other benefits including *seed to sale security, scalability, consistency due to year-round production, cost control, product safety and purity by eliminating environmental variability.*

The Company is also in the business of designing and distributing LED lighting solutions utilizing the COB and MCOB technology. The Company is focused on delivering cost efficient lighting to North America via advanced e-commerce sites the Company owns and operates. LEDCanada.com which caters to B2B customers is a supplier of the newest and highest demand LED solutions. The Company also owns and operates COBGrowlights.com which caters to both large and small agriculture green houses and controlled cultivation centers.
