CARL DATA SOLUTIONS INCORPORATES
DATA SCIENCE CENTRE IN POLAND

March 27, 2017 - Vancouver, British Columbia - Carl Data Solutions Inc. (CSE:CRL, FSE:7C5, OTC:CDTAF) ("Carl" or the "Company"), a developer of Big-Data-as-a-Service ("BDaaS")-based solutions for data integration, business intelligence, and Industrial Internet-of-Things ("IIoT") applications, recently incorporated the Company's data science centre in Gdansk, Poland. A wealth of local tech talent means it is an ideal location to continue growing Carl's team of leading data scientists and developers.

Carl CTO, Piotr Stepinski, is a senior software engineer with over a decade of Big Data application experience. His product development background allows him to lead projects with an agile and explorative development method that encourages innovation. The Carl data science team has experience applying software development and machine learning to a variety of industries, including utilities, health care and finance.

Recently, Stepinski co-published a case study with Microsoft based on Carl's break-through machine learning for sensor anomaly detection. The algorithms used will be key to providing time-saving solutions and features as IIoT networks continue to expand to include billions of data points from sensors that can create data quality issues.

Stepinski commented, "My goal for 2017 is to continue building a team of brilliant developers and data scientists who can apply our machine learning so it reaches its fullest potential. Moving beyond objective concepts to abstract and functional programming."

According to Forbes magazine, Poland is on its way to becoming a major European tech hub. A new Google Campus in Warsaw, and a favourable environment for IoT start-ups means there are many young, talented tech students and developers available to create change through disruptive technologies.

Greg Johnston, Carl's CEO, commented, "Though we are currently focused on North American markets, Carl's technology has global potential as infrastructure upgrades are needed throughout the world to operate cities and industry more efficiently. Poland is central to many emerging markets in Europe, while also providing a large pool of tech talent. We are very pleased to now have a permanent presence in Europe."

About Carl Data Solutions Inc.

Carl Data Solutions Inc. is focused on providing next generation information collection, storage and analytics solutions for data-centric companies. Building on its recent acquisitions, Flow Works Inc., a company that helps its clients analyze and understand all forms of environmental data through a powerful platform of data collection, monitoring, analysis and reporting tools and ETS., Carl continues to develop applications to work with new cloud-based mass storage services and analytics tools (Big-Data-as-a-Service ("BDaaS")).

Carl's development platform can accommodate virtually unlimited storage of any type of data. This technology allows Carl to build advanced applications for monitoring, reporting and analysis. Carl's data collection and storage methods allow the company to build smart Software-as-a-Service ("SaaS")-based applications that can collect data from many diverse sources and provide deep insight for decision-making purposes.
