**In General**

Trades occurring in the market-on-open facility will have each side designated as active or passive, according to time priority, and will either be charged a fee or earn a rebate on the same terms as in the continuous auction market.

The active side of a trade is the order that takes liquidity from the CSE and the passive side of a trade is the order that provides liquidity to the CSE.

There will be no minimum monthly trading fee and it is expected that some dealers will be earning a rebate from the CSE each month. For those who prefer, dealers may elect to defer realizing their rebates and instead preserve same as a rolling credit against future fee payments otherwise due to the CSE.

The fees and rebates described above are subject to change.
