1. Nature of Operations and Continuance of Business

Slave Lake Zinc Corp. (the "Company") was incorporated in the province of the British Columbia on September 14, 2016. The Company's principal business activities include the acquisition and exploration of mineral property assets located in North West Territories, Canada. The Company's head office is located at 207 St. Patrick's Avenue, North Vancouver, BC, V7L 3N3.

On November 7, 2018, the Company completed its Initial Public Offering and the Company's common shares are listed on the Canadian Securities Exchange ("CSE") under the trading symbol "SLZ".

On March 11, 2020, the World Health Organization declared COVID-19 a global pandemic. This contagious disease outbreak and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, leading to an economic downturn. The impact on the Company has not been significant, but management continues to monitor the situation.

These condensed financial statements have been prepared on the going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at March 31, 2021, the Company has no source of recurring revenue, generates negative cash flows from operating activities, and has an accumulated deficit of \$2,284,731. These factors raise significant doubt about the Company's ability to continue as a going concern. The continued operations of the Company are dependent on its ability to generate future cash flows or obtain additional financing. Management is of the opinion that sufficient working capital will be obtained from external financing to meet the Company's liabilities and commitments as they become due, although there is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. These condensed financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern.

2. Significant Accounting Policies

(a) Basis of Presentation

These condensed financial statements have been prepared in accordance with International Financial Reporting Standards applicable to interim financial information, as outlined in International Accounting Standard ("IAS") 34, "Interim Financial Reporting" and using the accounting policies consistent with those in the audited financial statements as at and for the year ended September 30, 2020.

These condensed financial statements do not include all disclosures normally provided in annual financial statements and should be read in conjunction with the annual financial statements as at and for the year ended September 30, 2020. Interim results are not necessarily indicative of the results expected for the fiscal year.

(b) Accounting Standards Issued But Not Yet Effective

Accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's financial statements.

3. Exploration and Evaluation Assets

The Company acquired the Property, a mineral claim ("MWK"), tag # F97540 in the South Slave region of the Northwest Territories, NTS Map 75E05, pursuant to a mineral property acquisition agreement (the "Acquisition Agreement") dated for reference February 7, 2017 among the Company as purchaser, Jaskarn Singh Rai, Ritchie John Wigham, Glen Colin Macdonald and Max Braden as vendors (the "Vendors") and 1089621 B.C. Ltd. as royalty holder (the "Royalty Holder"). Each of the Vendors is a founder and director of the Company and was a director of the Company at the time of entering into the Acquisition Agreement. Pursuant to the Acquisition, the Company acquired a 100% right, title, and interest in and to the Property, subject to a 3.5% net smelter returns royalty, by making a cash payment of \$1 to each of the Vendors. The acquisition of the Property by the Company was formalized by the Acquisition Agreement. The Property is subject to a 3.5% net smelter returns royalty (the "Royalty") to the Royalty Holder. The Company has the right to purchase 2/7th of the Royalty from the Royalty Holder at any time for \$1,000,000 after which the Royalty will be reduced to 2.5% of net smelter returns. After payment of \$1,000,000 the Company has the right to purchase 2/5th of the remaining Royalty for \$2,000,000 at any time after which the Royalty rate will be reduced to 1.5% of net smelter returns. The Property has a 10 kilometer area of interest, and any mineral claims or properties interest within this area that any of the Vendors and/or associated parties acquires, through staking or otherwise, will become part of the Acquisition Agreement and be subject to the Royalty.

On June 28, 2018, the Company entered into a 21-year lease commencing on August 30, 2016 with the Minister of Department of Indian Affairs and Northern Development. The claim is 188.12 hectares and has an annual rental fee of \$470 payable to the Minister of Department of Indian Affairs and Northern Development and there is no other capital commitment required to maintain the lease.

5. Convertible Debt

On February 18, 2021, the Company issued a convertible note for proceeds of \$650,000. The note bears interest at 5% per annum and is due on August 18, 2022. The note is convertible into common shares of the Company at \$0.08 per share. If the closing stock price of the Company's common shares is above \$0.20 for 20 consecutive trading days (provided it has traded on at least 13 of those days), the Company may on written notice require such amount of the principal amount to be converted to common shares of the Company. In connection with the convertible note, the Company issued 8,125,000 share purchase warrants exercisable at \$0.15 per common share expiring on February 18, 2025. The Company also incurred debt issuance costs of \$12,200 which was recorded as a reduction of the carrying value of the convertible note.

The convertible note was recorded using the residual method, where the convertible note was bifurcated into a debt component and equity component which is comprised of the embedded conversion feature. The fair value of the liability component at the time of issuance was determined to be \$532,024 using a net present value calculation assuming a discount rate of 20% per annum. As a result, the value of the equity component of \$117,976 was recorded in equity component of convertible debt and an equivalent discount on the convertible note which will be accreted to the face value of \$650,000 over the term of the note. During the period ended March 31, 2021, the Company recognized accretion expense of \$9,418, which brings the carrying value to \$529,242 as at March 31, 2021.

The fair value of the share purchase warrants was calculated using the Black-Scholes option pricing model assuming no expected dividends or forfeitures and the following assumptions: volatility of 143%, expected life of 4 years, and a risk-free rate of 0.49%. The fair value of \$489,741 was recorded as share-based payment reserve and interest expense.

6. Share Capital

On March 25, 2021, the Company issued 4,000,000 units at \$0.09 per unit for proceeds of \$360,000, of which \$45,000 was receivable as at March 31, 2021. Each unit consisted of one common share and one share purchase warrant exercisable at \$0.15 per common share expiring on March 25, 2023.

Slave Lake Zinc

**Management's Discussion and Analysis
For the Quarter Ended March 31, 2021**

This management's discussion and analysis ("MD&A") of the financial position and results of operations of Slave Lake Zinc Corp. (the "Company" or "Slave Lake"), prepared as of May 27, 2021, should be read in conjunction with the unaudited condensed financial statements for the quarter ended March 31, 2021 which were prepared in accordance with International Financial Reporting Standards. All amounts are expressed in Canadian dollars unless otherwise indicated.

This discussion contains forward-looking statements that involve risks and uncertainties. Such information, although considered to be reasonable by the Company's management at the time of preparation, may prove to be inaccurate and actual results may differ materially from those anticipated in the statements made.

CAUTION REGARDING FORWARD-LOOKING INFORMATION

This MD&A contains forward-looking statements and forward-looking information (collectively, "forward-looking statements") within the meaning of applicable Canadian legislation. These statements relate to future events or the future activities or performance of the Company. All statements, other than statements of historical fact are forward-looking statements. Forward-looking statements are typically identified by words such as: believe, expect, anticipate, intend, estimate, postulate and similar expressions, or which by their nature refer to future events. These forward-looking statements include, but are not limited to, statements concerning:

- the Company's strategies and objectives, both generally and in respect of its existing business and planned business operations;
- the Company's future cash requirements;
- general business and economic conditions;
- the Company's ability to meet its financial obligations as they come due, and to be able to raise the necessary funds to continue operations;
- the timing, pricing, completion, regulatory approval of proposed financings if applicable;

Although the Company believes that such statements are reasonable, it can give no assurance that such expectations will prove to be correct. Inherent in forward looking statements are risks and uncertainties beyond the Company's ability to predict or control, including, but not limited to, risks related to the Company's ability to raise the necessary capital or to be fully able to implement its business strategies, and other risks identified herein under "Risk Factors".

The Company cautions investors that any forward-looking statements by the Company are not guarantees of future performance, and that actual results are likely to differ, and may differ materially, from those expressed or implied by forward looking statements contained in this MD&A. Such statements are based on a number of assumptions, which may prove incorrect, including, but not limited to, assumptions about:

- general business and economic conditions;

For the reasons set forth above, investors should not attribute undue certainty to or place undue reliance on forward looking statements.

Historical results of operations and trends that may be interpreted from the following discussion and analysis may not necessarily indicate future results from operations. In particular, the Company has moved from a private corporation operating with very limited capital and therefore with very restricted operations, to a publicly traded venture issuer. Accordingly, drawing trends from the Company's limited operating history is difficult.

The Company is an exploration and development company formed for the purposes of exploring and, if warranted and feasible, developing a zinc, lead, copper, silver resource on our property at O'Connor Lake in the mining friendly Northwest Territories of Canada.

On November 7, 2018, the Company completed its Initial Public Offering ("IPO") and the Company's common shares are listed on the Canadian Securities Exchange ("CSE") under the trading symbol "SLZ".

Slave Lake has been active in maintaining non-physical contacts and actively pursuing a strategy to move forward with the exploration of the property. Travel restrictions have been in place due to the Covid-19 pandemic related to travel to the Northwest Territories.

On September 10, 2020, Slave Lake Zinc signed a collaboration agreement with the Northwest Territory Metis Nation. An initial Negotiation Agreement signed on January 22, 2020 provided the framework for the final Collaboration Agreement signed September 10, 2020 despite logistical and technical issues created by the COVID-19 crises. Our Collaboration Agreement will allow Slave Lake Zinc to dramatically advance the potential of the O'Connor Lake Project to the mutual benefit of all parties. With future exploration success at O'Connor Lake this agreement will set the stage for Slave Lake Zinc and the Northwest Territory Metis Nation ("NWTMN") to work toward an Impact Benefits agreement as the project further develops.

On February 18, 2021, the Company issued a convertible note for proceeds of \$650,000. The note bears interest at 5% per annum and is due on August 18, 2022. The note is convertible into common shares of the Company at \$0.08 per share. If the closing stock price of the Company's common shares is above \$0.20 for 20 consecutive trading days (provided it has traded on at least 13 of those days), the Company may on written notice require such amount of the principal amount to be converted to common shares of the Company. In connection with the convertible note, the Company issued 8,125,000 share purchase warrants exercisable at \$0.15 per common share expiring on February 18, 2025.

March 22, 2021 the Company initiated an extensive airborne geophysical survey to aggressively advance the O'Connor Lake Project. The first stage of this new field work was an airborne geophysical survey. This consisted of performing an 880-line kilometers of survey to acquire electromagnetic (EM) and magnetic response data for the project. The Company's extensive airborne survey has been designed to cover continuation of the established structural corridor that hosts the known mineralization. Anomalous results from this survey will be the subject further extensive follow up exploration on a timely basis

On March 25, 2021, the Company completed a private placement for \$360,000 and issued 4,000,000 units at a price of \$0.09 per unit. Each unit was comprised of one common share and one share purchase warrant with each warrant entitling the holder to purchase one additional share at a price of \$0.18 per share expiring on March 25, 2023.

On April 15, 2021, the Company appointed Steven Zadka as a director of the Company

On April 28, 2021, the airborne geophysical survey was completed the data acquisition phase of the planned detailed airborne geophysical survey at the Company's O'Connor Lake, NWT, exploration project. Data processing and interpretation is underway with target recommendations for follow up ground-based exploration and drilling programs expected shortly.

O'Connor Lake Project (the "Property")

The Company formally acquired the Property, a mineral claim ("MWK"), tag # F97540 in the South Slave region of the Northwest Territories, NTS Map 75E05, pursuant to a mineral property acquisition agreement (the "Acquisition Agreement") dated for reference February 7, 2017 among the Company as purchaser, Jaskarn Singh Rai, Ritchie John Wigham, Glen Colin Macdonald, and Max Braden as vendors (the "Vendors") and 1089621 B.C. Ltd. as royalty holder (the "Royalty Holder"). Each of the Vendors is a founder and director of the Company and was a director of the Company at the time of entering into the Acquisition Agreement. Pursuant to the Acquisition Agreement, the Company acquired a 100% right, title and interest in and to the Property, subject to a 3.5% net smelter returns royalty, by making a cash payment of \$1 to each of the Vendors. The acquisition of the Property by the Company was formalized by the Acquisition Agreement. The Property is subject to a 3.5% net smelter returns royalty (the "Royalty") to the Royalty Holder. The Company has the right to purchase 2/7th of the Royalty from the Royalty Holder at any time for \$1,000,000 dollars after which the Royalty will be reduced to 2.5% of net smelter returns. After payment of \$1,000,000 the Company has the right to purchase 2/5th of the remaining Royalty for \$2,000,000 dollars at any time after which the Royalty rate will be reduced to 1.5% of net smelter returns. The Property has a 10-kilometer area of interest, and any mineral claims or properties interest within this area that any of the Vendors and/or associated parties acquires, through staking or otherwise, will become part of the Acquisition Agreement and be subject to the Royalty.

On June 28, 2018, the Company entered a 21-year lease commencing on August 30, 2016 with the Minister of the Department of Indian Affairs and Northern Development. The claim is 188.12 hectares and has an annual rental fee of \$470 payable to the Minister of Department of Indian Affairs and Northern Development and there is no other capital commitment required to maintain the lease.

It is anticipated that at some point during the fiscal year that the Company will require further funding in the capital markets, to advance the project through further ground exploration and ultimately drilling, and to further future development of the O'Connor Lake property.

The current objective for the coming fiscal year is to advance the work done to date. We will also continue to further develop our relationship with the NWTMN and local indigenous communities to enhance and enlarge the current land position held by the Company.

OVERALL PERFORMANCE

The Company has no operational revenue and exploration activity is subject to the availability of funds raised through financings. Global financial and commodity markets have been volatile, and the Company is thus impacted by these generic industry factors which are beyond its control. The Company anticipates obtaining additional financing in the future primarily through further equity financing.

As at March 31, 2021, the Company has working capital of \$693,256 compared to a working capital deficit of \$36,579.

It is anticipated that the Company will have capital requirements in excess of its currently available resources and may need to seek additional financing. There can be no assurance that the Company will have adequate financing to meet its future capital requirements or that additional financing will be available on terms acceptable to the Company in the future.

FINANCIAL INSTRUMENTS

Financial instruments recorded at fair value on the statements of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three levels of the fair value hierarchy are as follows:

- Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair values of financial instruments, which include cash, accounts payable and accrued liabilities, amounts due to related parties, approximate their carrying values due to the relatively short-term maturity of these instruments.

FINANCIAL RISK MANAGEMENT

The Company has exposure to the following risks from its use of financial instruments:

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash. The Company limits its exposure to credit loss by placing its cash with high credit quality financial institutions. The carrying amount of financial assets represents the maximum credit exposure.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquid funds to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The Company currently settles its financial obligations out of cash. The ability to do this relies on the Company raising equity financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs.

Price risk

The Company is exposed to price risk with respect to commodity prices. The Company's ability to raise capital to fund exploration and development activities is subject to risks associated with fluctuations in the market price of commodities.

Other Risk

During March 2020, the World Health Organization declared COVID-19 a global pandemic. This contagious disease outbreak and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, leading to an economic downturn. The impact on the Company has not been significant, but management continues to monitor the situation.
