Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

Metalo Manufacturing Incorporated (MMI) has negotiated and closed a 1-year term 10% loan for C\$1 million which will retire a previous third-party loan for C\$575,000 as well as provide capital to initiate the balance of the required financing.

Grand River Ironsands Incorporated (GRI) has negotiated a US\$1 million financing but closing has been deferred due to current market volatility.

MMI is an indirect and major shareholder in the following two companies:

- **Pure Fonte Ltée (“PFL”) – a corporation building a proposed US\$408 million pig iron plant in Quebec**
- **North Atlantic Iron Corporation (“NAIC”) – a corporation owning mineral rights in Labrador, NL.**

MMI has a holding of 43.92% in GRI who owns 100% of PFL and 90% of NAIC. The trading symbol is ‘MMI’ and trades on the Canadian Securities Exchange (CSE).

Negotiations on term sheets for financing for both assets (pig iron plant and mineral sands) continue, with a debt solution being sought for the pig iron project. The negotiations are complex, markets are shifting, and investors remain cautious. Management remains confident a solution will be secured. The pig iron project is focused on a closing of US\$15-25 million for pre-construction activities including detailed engineering and permitting.

Negotiations for capital for the mineral sands is currently also being negotiated.

GRI has identified a site and continues to finalize the key issues for the proposed pig iron plant. A detailed rollout, with a public announcement on location and permitting strategy, will be forthcoming upon closing of the financing.

Upon concluding the Bankable Feasibility Study, production decisions will be made. The highlights of the feasibility study are expected to be released concurrent with the next round of financing.

Efforts will then be focused on activating the environmental permitting with a view to commencing construction, after approval. A parallel decision on Front End Engineering Design (FEED) and detailed engineering will be announced post the completion of financing.

2. Provide a general overview and discussion of the activities of management.

The Issuer continues to monitor the progress of GRI. Currently, GRI controls 100% of PFL, the owner of the pig iron project, and 90% of NAIC, the owner of the mineral sand’s asset. NAIC has recently commenced re-assessing potential minerals of value with the project in Labrador. Work plans for 2020 are being assessed. Upon closing the proposed financing for the minerals

sands a dedicated team will be put in place to advance the next steps including community consultations and permitting.

There have been significant shifts in several cost centres for the pig iron plant and the net effect is a marginal shift in project economics with CapEx declining – the movement of inputs and sales process will continue to fluctuate. Market prices and volumes remain volatile due to COVID-19 impacts.

Prices for iron ore concentrate continue to remain high, at close to US\$83/tonne for 62% Fe concentrate (last month it was \$79/t).

MMI currently has 18,830,815 shares issued and outstanding.

GRI currently has 23,769,327 shares issued and outstanding.
