

FORM 7

MONTHLY PROGRESS REPORT

Name of Listed Issuer: Metalo Manufacturing Inc. (the "Issuer").

Trading Symbol: MMI

Number of Outstanding Listed Securities: 19,378,872

Date: May 3, 2021

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered, nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

Metalco Manufacturing Incorporated (MMI) is focused on being an environmental leader in mining sands and the production of metals with near zero CO2 emissions, with its two advanced development projects. Both projects are independently and actively being presented to financial markets, especially those focused on Environmental, Social, and Corporate Governance (ESG) principles. The two MMI projects are indirectly controlled through Grand River Ironsands Incorporated (GRI):

1. Pure Fonte Ltée (PFL) – smelting plant for Québec with a new revenue stream:

- **PFL has temporarily delayed the imminent site announcement (originally planned for February 2021), while awaiting a full response from government regarding the proposed CO2 tax of \$170/t. It is expected that by mid-May 2021, a reply from the federal government will be received with a definition of the carbon credits. Our request is based on moving to a “near zero” carbon emissions solution, using PFL’s existing plant design. Clarification on this government policy is essential for PFL to finalize their decision. Existing steel and iron producers have been provided an exemption for 95% of their CO2 emissions. To build a near-zero emission plant, PFL is asking for the ability to sell the 400,000-700,000 carbon credits which this would facilitate. Achieving the ability to sell these carbon credits would redefine the future of this project. To make this investment decision, PFL must understand the benefit to firms, like PFL, with near zero emissions.**
- **The Supreme Court of Canada ruled on March 25, 2021, that the Federal government carbon pricing law is constitutional.**
- **Management has been unable to travel to the community since the last planned and suspended visit in October 2020, due to COVID restrictions. It is not known when these will be relaxed.**
- **MMI indirectly controls 44% of this project.**

2. North Atlantic Iron Corporation (NAIC) – the sands in Labrador:

- **NAIC is currently assessing a trading solution to ship bulk minerals – feldspars, high purity silica quartz, magnetite, and garnets. We have confirmation that the feldspars meet the specification for ceramics and the silica quartz for glassmaking.**
- **Lab studies are underway, which will take several months, to assess improving the grades of key minerals and separation process efficiencies.**

- A leading lab and their experts seek to assess producing synthetic gemstones given the grades and mineral structure. We are also studying the creation of ceramic and silica powders for 3D printing.
- We have studies confirming that the high-grade silica quartz sands, would meet specifications to produce glass and glass products. NAIC has engaged with two all-electric furnace technologies to make float glass using the low cost and clean hydroelectricity in Canada. Canada does not make float glass (for automotive, industrial, and residential markets). The higher grades are found in only 4-6 deposits in North America with a self-sufficiency requirement for float glass of 6-8 times the size of our targeted plant.
- The planning is focusing its mine planning on a strategy of “zero emissions from mine to port” using electric powered truck/shovels, electric powered separation circuit, and/or a slurry pipeline. Desktop studies have been completed on these component parts of the project.
- Several of the 15 areas of study for the application of mineral sands will have a need for low-cost hydroelectricity rate and term. Availability will decide where the plant is located.
- Discussions were on hold with the Province of Newfoundland and Labrador regarding the mineral claim impacts from the newly developed transmission lines. Definition is the basis for initiating permitting and finalizing a resource calculation. Four options were formally presented as potential solutions to the Province. As the provincial election has concluded, we anticipate the matter to be resolved in a timely manner.
- All efforts remain subject to travel restrictions due to COVID. For the past few months, travel to the province has been restricted.
- MMI indirectly controls 40% of this project, subject to financing.

Positive discussions for the capital required for both projects continue. Additionally, dialogue with traders remains encouraging.

2. Provide a general overview and discussion of the activities of management.

The Issuer continues to monitor the progress of GRI.

Progress on the permitting pertaining to both projects has been slow due to the restrictions of COVID-19 in the proposed site areas. In the proposed site areas, we have recognized that travel restrictions may remain for some time.

The general overview of Management is that the essential planning and assessment work is closing, and the focus is moving to seeking the authority to operate the respective projects and close the required financings.

MMI currently has 19,378,872 shares issued and outstanding.

GRI currently has 23,769,327 shares issued and outstanding.

MMI currently control 10,440,017 shares in GRI.

Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

There have been no acquisitions.

3. Describe and provide details of any products or services that were discontinued. For resource companies, provide details of any drilling, exploration or production programs that have been amended or abandoned.

Not applicable

4. Describe any new business relationships entered into between the Issuer, the Issuer's affiliates or third parties including contracts to supply products or services, joint venture agreements and licensing agreements etc. State whether the relationship is with a Related Person of the Issuer and provide details of the relationship.

Not Applicable

5. Describe the expiry or termination of any contracts or agreements between the Issuer, the Issuer's affiliates or third parties or cancellation of any financing arrangements that have been previously announced.

See paragraph 13 below.

6. Describe any acquisitions by the Issuer or dispositions of the Issuer's assets that occurred during the preceding month. Provide details of the nature of the assets acquired or disposed of and provide details of the consideration paid or payable together with a schedule of payments if applicable, and of any valuation. State how the consideration was determined and whether the acquisition was from or the disposition was to a Related Person of the Issuer and provide details of the relationship.

None

7. Describe the acquisition of new customers or loss of customers.

Not applicable

8. Describe any new developments or effects on intangible products such as brand names, circulation lists, copyrights, franchises, licenses, patents, software, subscription lists and trademarks.

None

9. Report on any employee hiring's, terminations or lay-offs with details of anticipated length of lay-offs.

None

10. Report on any labour disputes and resolutions of those disputes if applicable.

Not applicable

11. Describe and provide details of legal proceedings to which the Issuer became a party, including the name of the court or agency, the date instituted, the principal parties to the proceedings, the nature of the claim, the amount claimed, if any, if the proceedings are being contested, and the present status of the proceedings.

The Issuer was advised that on February 8, 2019, the trustee for the estate of Forks filed an adversary complaint in the United States Bankruptcy Court for the Eastern District of Pennsylvania (the “Court”) against the Issuer, Grand River Ironsands Incorporated, North Atlantic Iron Corporation and Francis MacKenzie (collectively, the “Defendants”). The trustee is alleging that the Defendants are responsible for the debts of Forks. On May 6, 2020, the Defendants’ Motion to Dismiss for Lack of Personal Jurisdiction was heard by Court. On November 12, 2020, the Court issued an order requiring the Plaintiff to submit an amended complaint within 30 days that complies with the requirements imposed by Federal Rules of Civil Procedure 8 and 10(b), including setting forth separate counts against the separate Defendants, with any count asserted against all Defendants so stating. The Court also ordered it has personal jurisdiction over Defendant Francis MacKenzie. The Plaintiff filed an amended complaint on December 10, 2020 and counsel to the Defendants filed its response on January 12, 2021. The Motion to Dismiss the Trustee’s amended complaint was heard on February 24, 2021 and the Judge has not rendered a decision yet. The Defendants maintain that the suit has no merit and are vigorously defending themselves. The matter is ongoing.

12. Provide details of any indebtedness incurred or repaid by the Issuer together with the terms of such indebtedness.

None

13. Provide details of any securities issued and options or warrants granted.

Security	Number Issued	Details of Issuance	Use of Proceeds ⁽¹⁾
Warrants	50,000	The Issuer also previously announced that it entered into a loan agreement with an arms-length lender (the “Lender”) pursuant to which the Issuer borrowed \$1,000,000 bearing an interest rate of 10% per annum (the “Loan”). The Loan matured on April 16, 2021 (the “Maturity Date”). In consideration of extending the Maturity Date of the Loan to April 16, 2022, the Corporation issued 50,000 share	N/A

		purchase warrants to the Lender (the "Loan Warrants"). Each Loan Warrant will entitle the holder to purchase one common share of the Issuer at an exercise price of \$0.15 for a period of two years.	
--	--	---	--

(1) State aggregate proceeds and intended allocation of proceeds.

14. Provide details of any loans to or by Related Persons.

None

15. Provide details of any changes in directors, officers or committee members.

16. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

Travel restrictions remain challenging. Climate change and all the related topics continue to evolve. MMI continues to ensure these impacts, and opportunities, are assessed on an ongoing basis.

As stated earlier, the impacts of the announced CO2 penalties in Canada (a proposed tax of \$170/t on CO2 emissions) has launched a new and significant source of revenue. By reducing CO2 emissions, at the core of MMI and partners' strategy, there is the potential to achieve new revenue streams that will deliver a meaningful impact. These regulatory events are evolving, and their definition is now a priority for MMI. The belief is that these measures will encompass the impacts of other countries exporting similar products to Canada.

Certificate of Compliance

The undersigned hereby certifies that:

1. The undersigned is a director and/or senior officer of the Issuer and has been duly authorized by a resolution of the board of directors of the Issuer to sign this Certificate of Compliance.
2. As of the date hereof there is no material information concerning the Issuer which has not been publicly disclosed.
3. The undersigned hereby certifies to the Exchange that the Issuer is in compliance with the requirements of applicable securities legislation (as such term is defined in National Instrument 14-101) and all Exchange Requirements (as defined in CNSX Policy 1).
4. All of the information in this Form 7 Monthly Progress Report is true.

Dated May 3, 2021.
