Report on Business:

1. Provide a general overview and discussion of the development of the Issuer’s business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Issuer is a bio-pharmaceutical company dedicated to the development and commercialization of therapies to treat progressive kidney disease. The Company’s focus is on developing three therapeutic products to slow and/or reverse the progression of kidney disease in patients at risk of end stage kidney failure, address the immediate need of individuals facing COVID-19 induced acute kidney injury and the identification of other opportunities where the Company’s existing and new intellectual property can be leveraged to address health issues.

The primary development program for XORTX is at a late clinical stage and is focused on demonstrating the effectiveness and potential of a first-in-class therapy for autosomal dominant polycystic kidney disease (“ADPKD”), an orphan disease. In addition, XORTX is continues to evaluate new chemical entities for the treatment of type 2 diabetic nephropathy (“T2DN”). The COVID-19 program focuses on protecting kidney function when viral infection may lead to acute kidney injury. This program relies on Oxypurinol’s advanced clinical development stage and a new formulation of this drug to protect kidney structure and function.

The Company’s most advanced development program, XRx-008 is a late clinical stage program focused on demonstrating the potential of the Issuer’s first-in-class therapy for ADPKD. XRx-008 is the development name given to XORTX’s proprietary oral formulation of Oxypurinol, and shows increased oral bioavailability compared to Oxypurinol alone.

XORTX is also developing a second oral formulation of Oxypurinol (XRx-101) for use in treating patients infected with the coronavirus COVID-19 infection and suppression of acute kidney injury and associated health consequences.

And finally, XORTX is currently evaluating xanthine oxidase inhibitor candidates for the XR_x-221 program to treat T2DN as well as developing new chemical entities to address the large unmet medical need.

2. Provide a general overview and discussion of the activities of management.

In December 2020, XORTX continued to advance both its ADPKD program (XR_x-008) toward a phase 3 “registration” clinical trial and ‘orphan designation’ as well as its COVID-19 treatment program (XR_x-101, a new formulation of Oxypurinol) as a novel treatment for acute kidney and lung injury accompanying Coronavirus infection and specifically for the COVID-19 infection.

On December 29, 2020, the Issuer received notice of grant of European patent for compositions of formulations key to XORTX’s platform technology. This European patent grant strengthens the Issuer’s intellectual property portfolio in the EU. Importantly, this European patent grant protects XORTX’s XR_x-008, a first-in-class program for ADPKD. Grant of this 20-year patent will provide the Issuer with protection to expand its clinical trials, commercialization and partnering opportunities throughout Europe. ADPKD is a rare disease with orphan disease programs in EU, US and Japan of protecting market exclusivity for 10, seven and 10 year periods respectively. Including this newly allowed patent, the Issuer now has four granted patents in the US and/or EU covering compositions and uses of uric acid lowering agents to treat and prevent kidney disease, hypertension, insulin resistance, diabetic nephropathy (DN).
