MONTHLY PROGRESS REPORT

Name of Listed Issuer: Metalo Manufacturing Inc. (the "Issuer").

Trading Symbol: MMI

Number of Outstanding Listed Securities: 17,766,988

Date: August 8, 2018

This Monthly Progress Report must be posted before the opening of trading on the fifth trading day of each month. This report is not intended to replace the Issuer's obligation to separately report material information forthwith upon the information becoming known to management or to post the forms required by Exchange Policies. If material information became known and was reported during the preceding month to which this report relates, this report should refer to the material information, the news release date and the posting date on the Exchange website.

This report is intended to keep investors and the market informed of the Issuer's ongoing business and management activities that occurred during the preceding month. Do not discuss goals or future plans unless they have crystallized to the point that they are "material information" as defined in the Policies. The discussion in this report must be factual, balanced and non-promotional.

General Instructions

- (a) Prepare this Monthly Progress Report using the format set out below. The sequence of questions must not be altered, nor should questions be omitted or left unanswered. The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.
- (b) The term "Issuer" includes the Issuer and any of its subsidiaries.
- (c) Terms used and not defined in this form are defined or interpreted in Policy 1 – Interpretation and General Provisions.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer's business and operations over the previous month. Where the Issuer was inactive disclose this fact.

Metalo Manufacturing Incorporated (MMI) is an indirect and major shareholder in a proposed US\$408 million pig iron project and a Labrador Mineral Sands project. MMI has a holding of 43.92% in Grand River Ironsands Incorporated (GRI) who control no less than 90% of both the pig iron project and the mineral sands of Labrador. The trading symbol is 'MMI' and trades on the Canadian Securities Exchange (CSE).

Grand River Ironsands Incorporated (GRI), has engaged Brock Capital of New York as its investment bank on structuring the US\$408 million required for the pig iron plant. Plans are to close a tranche of US\$20 million shortly to fulfil the financial needs identified as "pre-construction". Term sheets are in negotiation for US\$15 million and C\$4 for preconstruction along with C\$50 million (with a second round for C\$65 million) for project financing with the respective parties.

Additionally, GRI reports at least two expressions for offtake from well-established industry leaders for the final product are well advanced. For feedstock supply, proposals for supply for approximately 75% of required raw materials are underway.

GRI currently owns 100% of Pure Fonte Ltée which has been incorporated to undertake the pig iron project. GRI has agreed to provide a 10% ownership position to Petmin Limited in exchange for Petmin providing 10% in their proposed Ohio plant – both positions are subject to a financing dilution. This exchange has not yet occurred.

GRI is now moving forward in its efforts to finalize the key issues on a site decision, for the proposed pig iron plant. A detailed rollout with a public announcement on location and permitting strategy will be forthcoming.

GRI advises it has intensified its effort to add additional corporate and technical personnel, as well. Upon concluding adjustments to the Bankable Feasibility Study, production decisions will be made. The highlights of the feasibility study are expected to be released in Q3 2018.

Next efforts will be to activate permitting with a view to initiate construction in Q2 2019. Concurrently, announcements of Front End Engineering Design (FEED) and detailed engineering will be announced post the completion of financing.

2. Provide a general overview and discussion of the activities of management.

The Issuer continues to monitor the progress of GRI. The current mandate is to be North America's first dedicated premium pig iron producer. Additionally, mineral claims near Happy Valley-Goose Bay, NL continue to be held and these claims are now being advanced for market assessment. Efforts to complete the planned market study are expected prior to the end of 2018.

A flow-through issue and/or private placement is currently being marketed to define this project in Labrador.

MMI currently has 17,776,988 shares issued and outstanding.

3. Describe and provide details of any new products or services developed or offered. For resource companies, provide details of new drilling, exploration or production programs and acquisitions of any new properties and attach any mineral or oil and gas or other reports required under Ontario securities law.

(1) State aggregate proceeds and intended allocation of proceeds.

15. Provide details of any loans to or by Related Persons.

A loan in the amount of \$621,000 was advanced to Pure Fonte Ltée by a non-related party which shall bear interest at a rate of 5% per annum for a period of 3 years. The loan and interest will be capitalized to the end of term and are convertible into shares at the option of the holder.

16. Provide details of any changes in directors, officers or committee members.

None

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer’s market(s) or political/regulatory trends.

The Issuer remains focused on its investment in GRI, whose primary goal is adding value to iron ore, with a proven manufacturing/smelting process. Essentially taking iron ore trading at US\$65/tonne (62% Fe) and producing a premium pig iron selling at more than US\$500/tonne. The key aspect of the MMI investment in GRI is focused on the iron foundry and steel mill supply chain. Prices for pig iron have generally remained above US\$400/tonne for more than a year. Raw materials prices for iron ore, natural gas and electricity have also remained in forecasted ranges.

GRI continues to monitor potential NAFTA discussions, particularly, recent announcements about tariffs on steel and aluminium.

GRI is closely monitoring the consequences of carbon penalties in Canada.

In summary, the goal for GRI is to add value to mineral resources and be the lowest carbon emitter globally, while becoming the lowest cost North American producer of a quality premium pig iron product required by foundries and steel mills.

GRI is continuing efforts to advance the mineral sands of Labrador where global experts and a significant investment have been directed to understanding the economic values of its claims over the past number of years.
