The answers to the items must be in narrative form. State when the answer to any item is negative or not applicable to the Issuer. The title to each item must precede the answer.

Report on Business

1. Provide a general overview and discussion of the development of the Issuer’s business and operations over the previous month. Where the Issuer was inactive disclose this fact.

The Company remains focused on exploring and obtaining prospects of merit that may contain lithium. The Company is also focused on developing a commercial application for its Direct Lithium Carbonate Extraction ("DLCE") Technology. The Company intends to license or joint venture its commercialized DLCE technology to current and future lithium carbonate producers.

2. Provide a general overview and discussion of the activities of management.

On July 16, 2025, the company announced a first tranche closing of Term Loans pursuant to its previous news release of April 4, 2025. The Company has entered into Loan Agreements (the "Loans") with lenders borrowing a total of $107,200. The Loans are unsecured and will bear interest of 8% per annum. The term of the Loans will be twelve (12) months or five (5) business days following a written notice of the Company that the Company has raised a minimum of one million dollars through an equity or debt financing.

As an inducement for the Loans, the Company has issued an aggregate of 3,573,332 share purchase warrants to the lenders. Each share purchase warrant will entitle the holder to purchase one common share of the Company at an exercise price of C$0.05 for a period of twenty-four (24) months expiring on July 15, 2027. All securities issued under the Loan will be subject to four (4) months and one day hold period expiring November 16, 2025.

The company also announced that it has entered into an Umbrella Technology Agreement with a major mining company. The mining company is to provide the Company two (2) separate brine samples to be tested for Lithium Recovery using the Company's novel lithium recovery technology that will enable lithium carbonate production directly from natural brines in a single step. During the testing period, the mining company will provide funding and will have the right to continue to work with OWL to advance the technology by contributing to the financing of a phase two program to continue the R&D work on the technology.

On September 30, 2025, the Company announced that it will delist its shares from the US OTCQB to the Pink Limited equity market effective October 01, 2025. After a thorough review of its two main listings (CSE and OTCQB) the Management and Board of the Company have determined that the costs associated with a dual listing are not warranted at this time and that savings from this decision will go to support the companies ongoing working capital and research and development needs. This decision does not preclude the Company from re-listing its shares on the OTCQB at a later date.
